

# Daily Status Report

Name : M. Eswari

Date : 08-12-2025

Today I worked on the healthcare user interface by improving the All Medicines section with a clean and easy-to-browse layout. Users can now quickly view products, compare prices, and add items to the cart for a smoother shopping experience.

The navbar ensures smooth navigation, while the hero section offers a clean banner with search and quick feature access. The conditions module highlights major health categories, helping users quickly find medicines based on specific needs.

A screenshot of a code editor (VS Code) showing a React application structure. The left sidebar shows a tree view of files under 'src' for 'USERINTERFACE\_HEALTHCARE'. The main editor area shows a file named 'MedicineHero.jsx' with the following code:

```
1 import './Medicinestyle/MedicineHero.css';
2 export default function MedicineHero() {
3     return (
4         <section className="hero">
5             <h1>Buy Medicines and Essentials</h1>
6             <div className="search-bar">
7                 <input type="text" placeholder="Search Medicines" aria-label="Search Medicines" />
8             </div>
9         </section>
10    );
11 }
12
13
14
15
16 }
```

The bottom right corner of the editor shows two ESLint errors:

- Line 110:13: The href attribute is required for an anchor to be keyboard accessible. Provide a valid, navigable address as the href value. If you cannot provide an href, but still need the element to resemble a link, use a button and change it with appropriate styles. Learn more: <https://github.com/jsx-eslint/eslint-plugin-jsx-a11y/blob/HEAD/docs/rules/anchor-is-valid.md> `jsx-a11y/anchor-is-valid`
- Line 111:13: The href attribute is required for an anchor to be keyboard accessible. Provide a valid, navigable address as the href value. If you cannot provide an href, but still need the element to resemble a link, use a button and change it with appropriate styles. Learn more: <https://github.com/jsx-eslint/eslint-plugin-jsx-a11y/blob/HEAD/docs/rules/anchor-is-valid.md> `jsx-a11y/anchor-is-valid`

The bottom status bar indicates 'webpack compiled with 1 warning'.

```

src > components > MedicalPage > Medicinejsx > Conditions.jsx > Conditions.js
28 import "./MedicineStyling/conditions.css";
29 export default function Conditions() {
30   const items = [
31     {
32       name: "Diabetes Care",
33       img: "https://static.vecteezy.com/system/resources/previews/054/655/042/non_2x/a-hand-holding-a-cell-phone-with-a-blood-drop-.png",
34     },
35     {
36       name: "Cardiac Care",
37       img: "https://img.icons8.com/color/48/heart-health.png",
38     },
39     {
40       name: "Stomach Care",
41       img: "https://img.icons8.com/color/48/stomach.png",
42     },
43     {
44       name: "Pain Relief",
45       img: "https://png.pngtree.com/png-clipart/20240324/original/pngtree-knee-joint-bones-pain-png-image_14670869.png",
46     },
47     {
48       name: "Liver Care",
49       img: "https://img.icons8.com/color/48/liver.png",
50     },
51     {
52       name: "Oral Care",
53       img: "https://img.icons8.com/color/48/tooth.png",
54     },
55     {
56       name: "Respiratory",
57       img: "https://img.icons8.com/color/48/lungs.png",
58     },
59   ];

```

The screenshot shows a clean, modern UI for a healthcare e-commerce platform. The top navigation bar provides easy access to various product categories. The central hero section is designed to engage users with its clear call-to-action and search functionality. Below this, a grid of cards allows users to quickly navigate to specific health condition pages. The 'Popular Brands' section highlights well-known pharmaceutical companies.

The navbar provides smooth navigation across key sections with clear menus and profile options. The hero section welcomes users with a clean banner, search bar, and quick access to essential features. The conditions module displays major health categories, helping users easily browse medicines based on their needs.

Ln 17, Col 27 Spaces: 2 UTF-8 CRLF JavaScript JSX node powershell

The screenshot shows a web page with a dark header containing navigation links for Jhal Products, Baby Care, Nutritional Drinks, Women Care, Personal Care, Ayurveda, and Health Devices. Below the header is a section titled "Popular Brands" featuring six boxes, each representing a brand with a logo, a discount offer (e.g., UP TO 15% OFF), and the brand name (Dhoottapapeshwar, AVP, Himalaya, Kottakkal Ayurveda, Rasayanam, Zandu). Below this is a section titled "Minimum 50 Percent Off" displaying four product images: L'Oréal hair oil, Nivea Fresh deodorant, LACTO CALAMINE sun cream, and GARNIER Vitamin C face wash.

The Value Deals section showcases essential products at attractive discounted prices to help users save more. It provides a clean product grid with clear pricing, discounts, and quick add-to-cart options for easy shopping.

The screenshot shows a code editor with a dark theme, displaying the file `ValueDeals.jsx`. The code implements a component that takes an array of products and a callback for adding items to the cart. It uses a CSS-in-JS approach with `styled-components` to style the product cards. The component includes logic to calculate current price, original price, and discount percentage. An "Add to Cart" button is included, which triggers the `addToCart` function with the product details.

```

import "../Medicinetyling/valueDeals.css";
export default function ValueDeals({ products, addToCart }) {
  return (
    <section className="value-deals">
      <h2>Value Deals at Rs 100</h2>
      <div className="products-grid">
        {products.map((product) => (
          <div className="product-card" key={product.name}>
            <button
              aria-label="Add ${product.name} to cart"
              onClick={() => addToCart({
                name: product.name,
                currentPrice: product.currentPrice,
              })}
            >ADD TO CART</button>
          </div>
        ))
      </div>
    </section>
  );
}

```

The doctor page helps users find specialists through a clean hero banner and animated specialization grid.

It allows quick navigation to different medical fields for consultations and detailed doctor listings.

```

import { specializations } from "../jsx/specializations";
import "../doctorStyle/doctor.css";
import { useScrollAnimations } from "../jsx/useScrollAnimations";

export default function Specializations() {
  useScrollAnimations();

  return (
    <section className="specializations-section">
      <h2>consult by Specialization</h2>
      <div className="specialization-grid">
        {specializations.map((item, index) => (
          <div key={index} className="specialization-card animate-on-scroll" style={{ animationDelay: `${(index * 0.1)s` } }} onClick={() => (window.location.href = item.link)}>
            <i className={`fas ${item.icon}`}></i>
            <h3>{item.name}</h3>
            <p>{item.doctors}</p>
          </div>
        )));
      </div>
    </section>
  );
}

```

A screenshot of a web browser window with the URL "localhost:3000/doctor". The page has a dark teal header with the text "Find the Best Doctors Near You" and a "doctor" logo. Below the header is a sub-header "Book appointments with trusted specialists instantly.". The main content area features a section titled "Consult by Specialization" with seven categories arranged in two rows: Cardiology (150+ Doctors), Dermatology (120+ Doctors), Neurology (98+ Doctors), Orthopedics (180+ Doctors), Pediatrics (200+ Doctors) in the top row; and Gynecology (140+ Doctors), ENT (90+ Doctors), Psychiatry (75+ Doctors) in the bottom row.

## Find the Best Doctors Near You

Book appointments with trusted specialists instantly.

### Consult by Specialization

Specialization	Number of Doctors
Cardiology	150+ Doctors
Dermatology	120+ Doctors
Neurology	98+ Doctors
Orthopedics	180+ Doctors
Pediatrics	200+ Doctors
Gynecology	140+ Doctors
ENT	90+ Doctors
Psychiatry	75+ Doctors
