

# Today Work Update

**Name: B. Lasya Priya**

Date: 26-1-2026

Today, I prepared comprehensive test cases for the APRERA application Home page and related modules. The test cases cover scrolling notifications, header menus, dropdown behaviors, navigation links, validations and invalidations, responsiveness, network conditions, authorization handling, and overall UI stability. I also created test cases for key tiles such as Project Registration, Agent Registration, Complaint Registration, Guidelines, and FAQ, including visibility, navigation, URL validation, error handling, and session-related scenarios. All test cases were reviewed, executed, and documented with expected and actual results, ensuring complete functional and negative coverage for the application.
