

# Dailuy Status Report

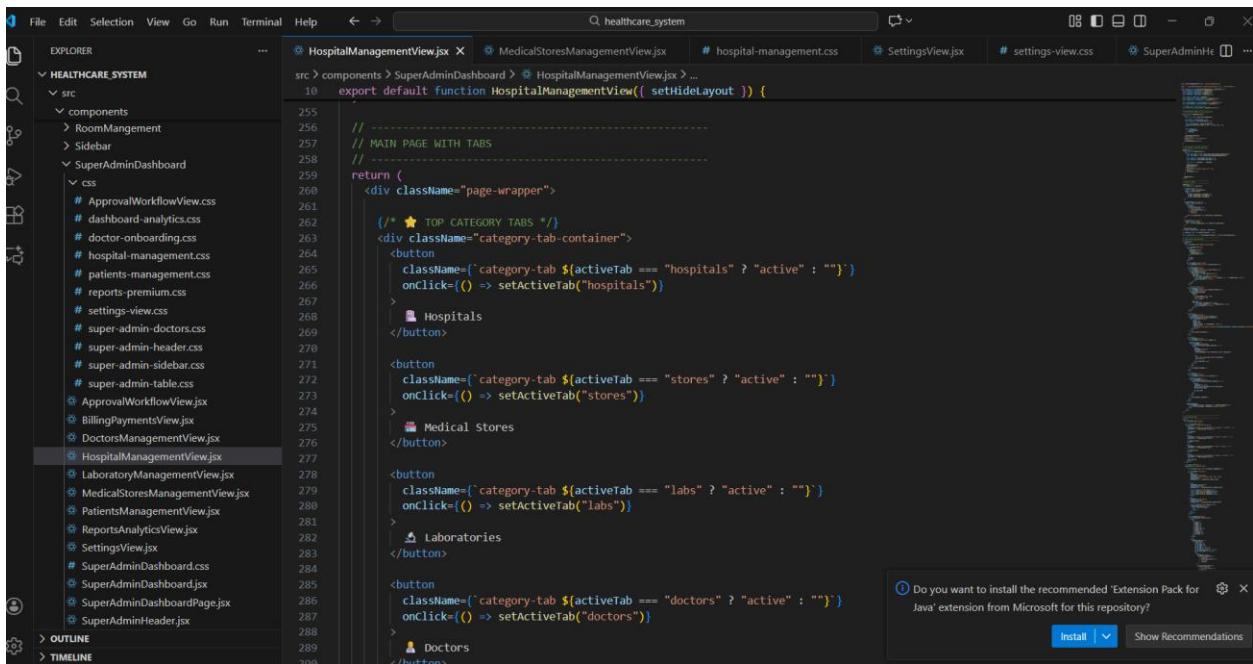

Name : M. Eswari

Date : 05-12-2025

Today I worked on the healthcare project, improving the user interface with tabs, navbar updates, and sidebar enhancements. I also updated the Super Admin dashboard for smoother navigation and better module management.

## SuperAdminDashboard.jsx

In super admin dashboard Integrated tabs for Hospitals, Medical Stores, Laboratories, and Doctors to switch views easily. Each tab now loads its respective data and management page without changing your existing code.

```
File Edit Selection View Go Run Terminal Help < > Q healthcare_system

|    |      |      |      |           |      |        |         |         |

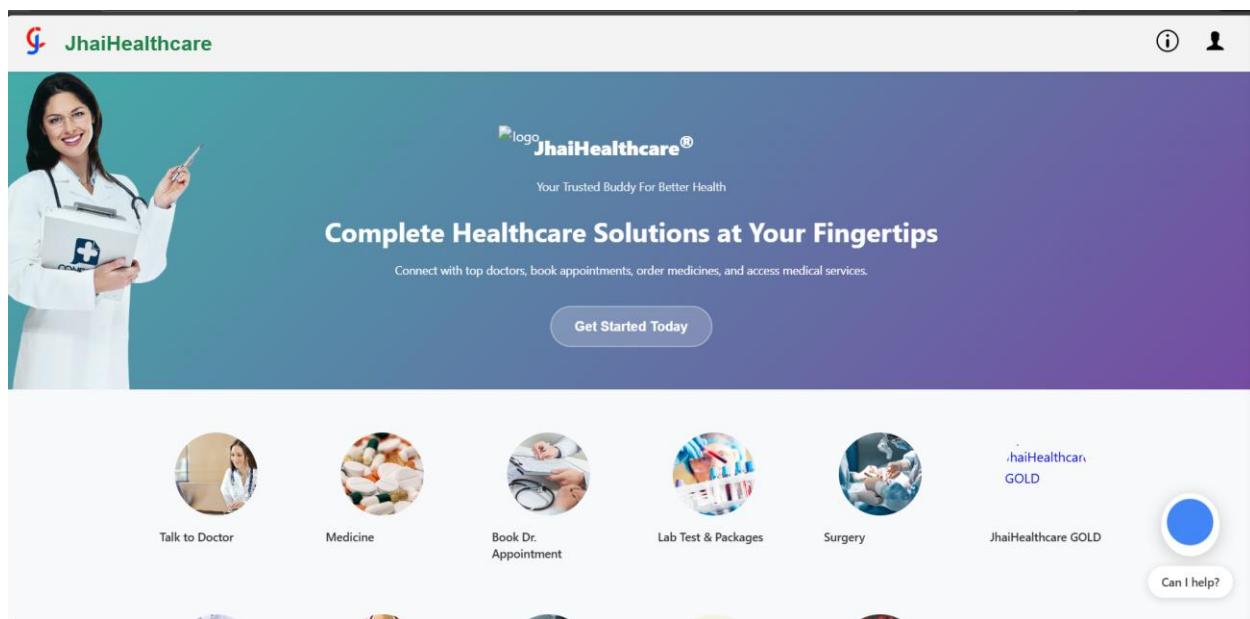

## UserInterface.jsx

In userinterface The navbar styling was updated by adding the new CSS on top of the existing code without removing anything. It now applies the modern fixed layout, improved spacing, and scroll behavior through override rules

```

File Edit Selection View Go ...
File Explorer Home.jsx # home.css # navbar.css ...
src > components > jsx > Home.jsx > Home
3 import Hero from "../jsx/Hero"; > brand-row Aa ab * No results ↑ ↓ ⌂ ×
4 import ServicesGrid from "../jsx/ServicesGrid";
5 import ConsultationBanner from "../jsx/ConsultationBanner";
6 import SpecialisedDoctors from "../jsx/SpecialisedDoctors";
7 import CashlessSupport from "../jsx/CashlessSupport";
8 import VideosSection from "../jsx/VideosSection";
9 import Chatbot from "../jsx/chatbot";
10 import RoboAssistant from "../jsx/RoboAssistant";
11
12 function Home() {
13   return (
14     <>
15       <Navbar />
16       <Hero />
17       <main className="main-content">
18         <div className="container">
19           <ServicesGrid />
20
21           <ConsultationBanner />
22           <SpecialisedDoctors />
23           <CashlessSupport />
24         </div>
25       </main>
26       <VideosSection />
27       <Chatbot />
28       <RoboAssistant />
29     </>
30   );
31 }
32
33 export default Home;
34

```

The sidebar keeps your original structure and only extends its styling with new rules for smooth sliding and layout control. Its animation, spacing, and menu behavior now work consistently with the updated navigation styling.

```
src > components > Navbar.jsx
  8  function Navbar() {
  91   /* ===== SIDEBAR ===== */
  92   <div className={`${sidebarOpen ? "active" : ""}`}>
  93     <div className="sidebar-header">
  94       <div className="user-info">
  95         
  99         <div>
 100           <strong>John Doe</strong>
 101           <div>john.doe@example.com</div>
 102         </div>
 103       </div>
 104       <span className="close-btn" onClick={() => setSidebarOpen(false)}>
 105         &times;
 106       </span>
 107     </div>
 108     <ul className="sidebar-menu">
 109       <li><a href="/">Home</a></li>
 110       <li>Manage Family Members</li>
 111       <li><a href="/appointments">My Appointments</a></li>
 112       <li>Address Book</li>
 113       <li>My Memberships</li>
 114       <li><a href="/orders">My Orders</a></li>
 115       <li>Transactions and Payments</li>
 116       <li>All Health Records</li>
 117       <li>Need Help</li>
 118       <li className="logout">Logout</li>
 119     </ul>
 120   </div>
 121   </div>
 122 </>
 123 );
 124 );
 125 }
```
