

Daily Status Report

Name : M. Eswari

Date : 06-01-2026

Today I worked on the Dental and Vaccination modules by improving appointment booking and service details. I also enhanced the UI and data flow to ensure smooth consultations and accurate vaccination schedules.

The Vaccination module provides information on available vaccines, schedules, and eligibility. Users can book vaccination slots, get reminders, and manage immunization records smoothly.

A screenshot of a code editor (VS Code) showing the Vaccination.js file in a React project. The project structure in the Explorer sidebar includes components like Home.jsx, RoboAssistant.jsx, ServicesGrid.jsx, SpecialisedDoctors.jsx, VideoSection.jsx, LabTest, login, MedicalPage, navbar, GuestMenu.jsx, ModuleNavbar.jsx, Navbar.jsx, Sidebar.jsx, and various CSS files for COVID-19, Dental, Nutrition, and Vaccination. The Vaccination.js file contains code for defining vaccination services:

```
src > components > Services > Vaccination.js U
1 import React from 'react';
2 import './Vaccination.css';
3
4 const Vaccination = () => {
5   const vaccinationServices = [
6     {
7       title: "Routine Childhood Immunization",
8       description: "Essential vaccines for infants & young children",
9       iconText: "👶",
10      duration: "Multiple doses",
11      color: "#10b998",
12    },
13    {
14      title: "Adult Booster Shots",
15      description: "Tdap, Influenza, Pneumococcal & shingles",
16      iconText: "🌐",
17      duration: "Annual / as needed",
18      color: "#6366f1",
19    },
20    {
21      title: "COVID-19 Vaccination",
22      description: "Booster doses & updated formulations",
23      iconText: "🦠",
24      duration: "Single / booster",
25      color: "#ef4444",
26    },
27    {
28      title: "Travel Vaccines",
29    }
30  ];
31
32  return (
33    <div>
34      <h2>Vaccination Services</h2>
35      <ul style={{listStyleType: 'none', padding: 0}}>
36        {vaccinationServices.map(service => (
37          <li key={service.title}>
38            <div style={{display: 'flex', align-items: 'center'}}>
39              <img alt={service.iconText} style={{width: 20px, height: 20px}}/>>
40              <div style={{marginLeft: 10px}}>
41                <strong>{service.title}</strong>
42                <br/>
43                {service.description}
44              </div>
45            </div>
46          </li>
47        ))}
48      </ul>
49    </div>
50  );
51
52  export default Vaccination;
```

The terminal tab shows a warning from webpack: "src/App.js Line 8:8: 'MedicinePage' is defined but never used no-unused-vars". The status bar at the bottom indicates the code is 1 warning away from being compiled.

Vaccination Services

Protect yourself and your loved ones with safe vaccinations

Our Vaccination Programs

Routine Childhood Immunization

Adult Booster Shots

COVID-19 Vaccination

Book Now

Book Now

Book Now

Before travel

Yearly

2–3 doses

Travel Vaccines

Yellow fever, Typhoid, Hepatitis A/B, Rabies

Flu & Seasonal Vaccines

Annual influenza protection for all ages

HPV Vaccination

Protection against HPV-related cancers

The image shows the homepage of JhaiHealthcare. At the top, there is a navigation bar with links: 'Talk to Doctor', 'Medicine', 'Book Dr. Appointment', 'Lab Test & Packages', 'Surgery', 'JhaiHealthcare GOLD', and 'About Us'. There is also a user profile icon. Below the navigation bar, there are three main service boxes. The first box is titled 'Travel Vaccines' and lists 'Yellow fever, Typhoid, Hepatitis A/B, Rabies'. It includes a 'Before travel' button and a 'Book Now' button. The second box is titled 'Flu & Seasonal Vaccines' and lists 'Annual influenza protection for all ages'. It includes a 'Yearly' button and a 'Book Now' button. The third box is titled 'HPV Vaccination' and lists 'Protection against HPV-related cancers'. It includes a '2-3 doses' button and a 'Book Now' button. At the bottom of the page, there is a large green call-to-action box with the text 'Stay Protected, Stay Healthy' and a 'Book Appointment' button.

The Dental module enables users to find dentists, book appointments, and access oral health services easily online. It helps patients view treatment details, clinic availability, and consultation options in one place.

```
src > components > Services > Dental.jsx ...  
1 import React from "react";  
2 import "./Dental.css"; // separate CSS file  
3  
4 const Dental = () => {  
5   const dentalServices = [  
6     {  
7       title: "General Dental Checkup",  
8       description: "Routine examination, cleaning & oral health assessment",  
9       icon: "👉",  
10      duration: "30-45 min",  
11      color: "#14b8a6",  
12    },
