

Daily Status Report

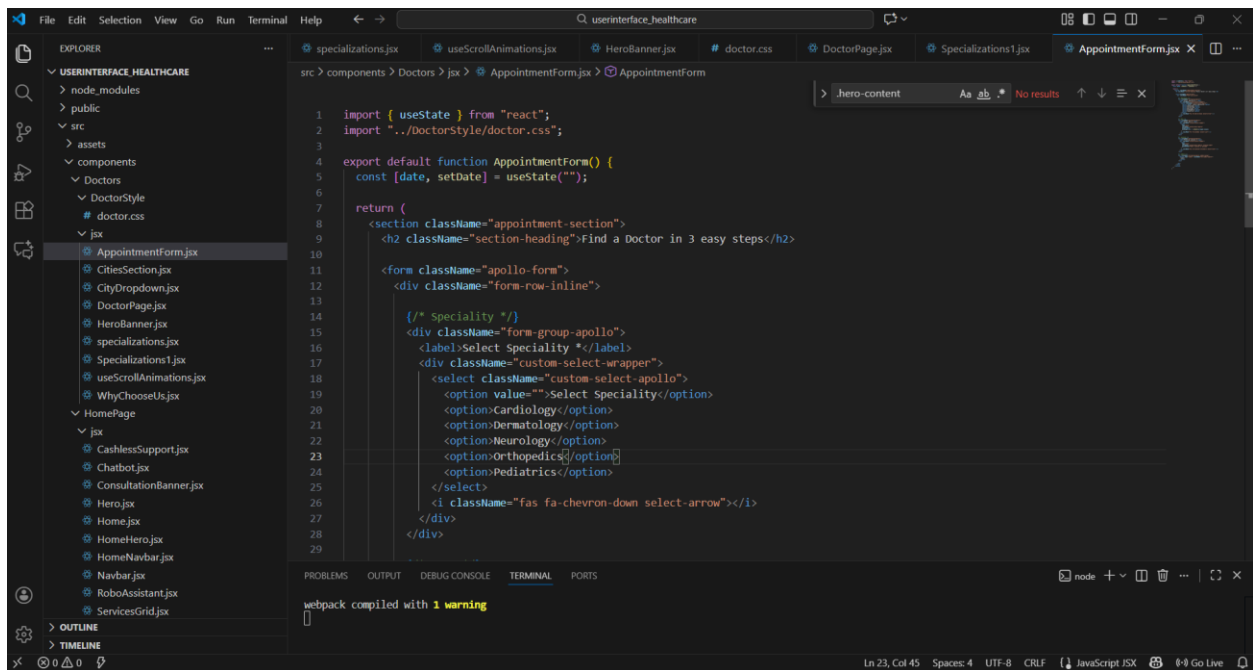

Name : M. Eswari

Date : 10-12-2025

Today I worked on improving the overall doctor interface by adding the Find a Doctor form, Specializations, City-based search, and Why Choose Us features. These updates make the doctor discovery experience smoother, more organized, and easier for users to navigate.

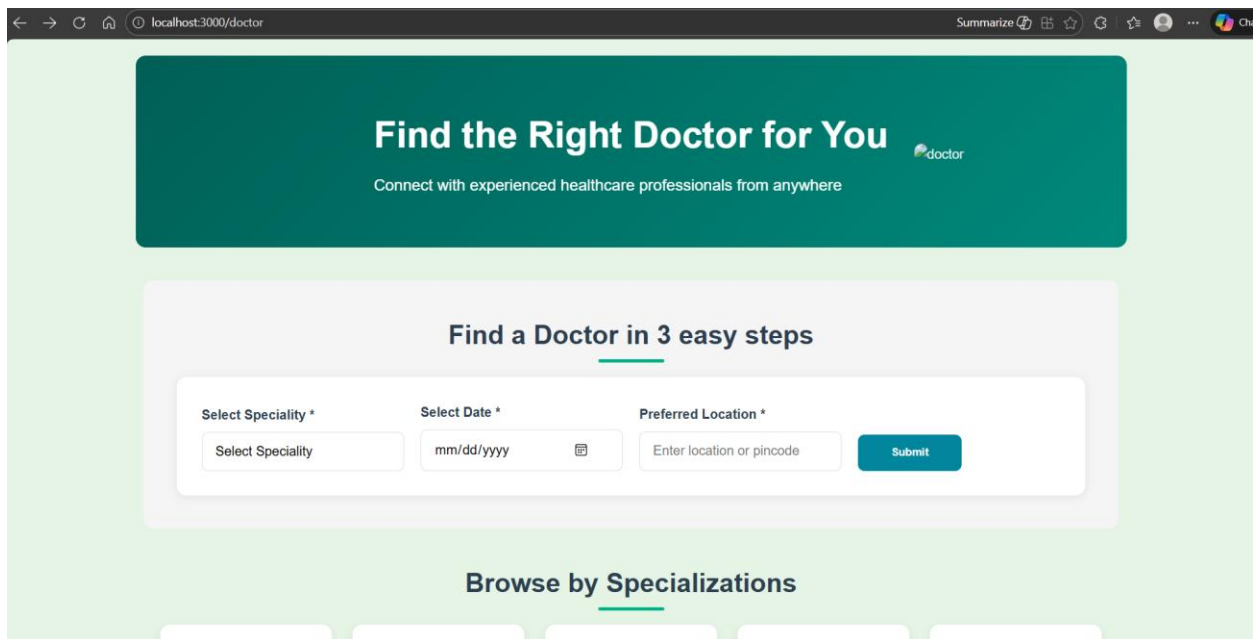

This section helps users quickly pick a speciality, choose a date, and enter a location to book a doctor. It simplifies the entire appointment process into a fast and user-friendly form.

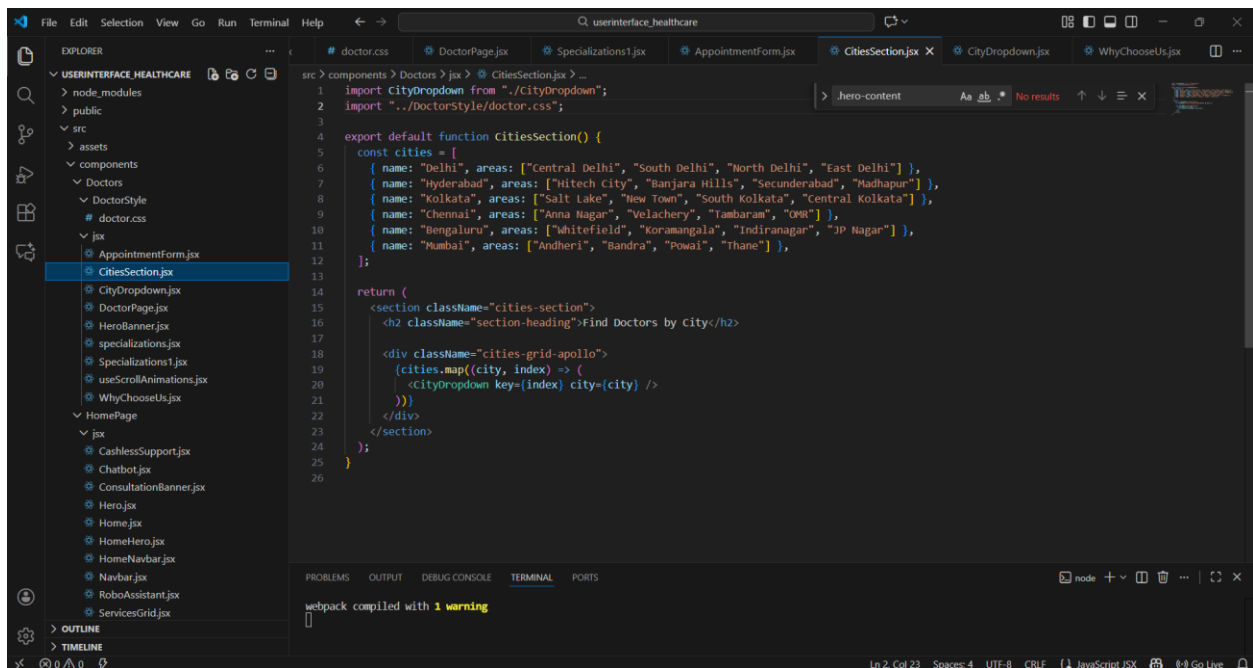

```
1 import { useState } from "react";
2 import "../DoctorStyle/doctor.css";
3
4 export default function AppointmentForm() {
5   const [date, setDate] = useState("");
6
7   return (
8     <section className="appointment-section">
9       <h2 className="section-heading">Find a Doctor in 3 easy steps</h2>
10
11       <form className="apollo-form">
12         <div className="form-row-inline">
13
14           {/* Speciality */}
15           <div className="form-group-apollo">
16             <label>Select Speciality *</label>
17             <div className="custom-select-wrapper">
18               <select className="custom-select-apollo">
19                 <option value="">Select Speciality</option>
20                 <option>Cardiology</option>
21                 <option>Dermatology</option>
22                 <option>Neurology</option>
23                 <option>Orthopedics</option>
24                 <option>Pediatrics</option>
25               </select>
26               <i className="fas fa-chevron-down select-arrow"></i>
27             </div>
28           </div>
29
```

webpack compiled with 1 warning

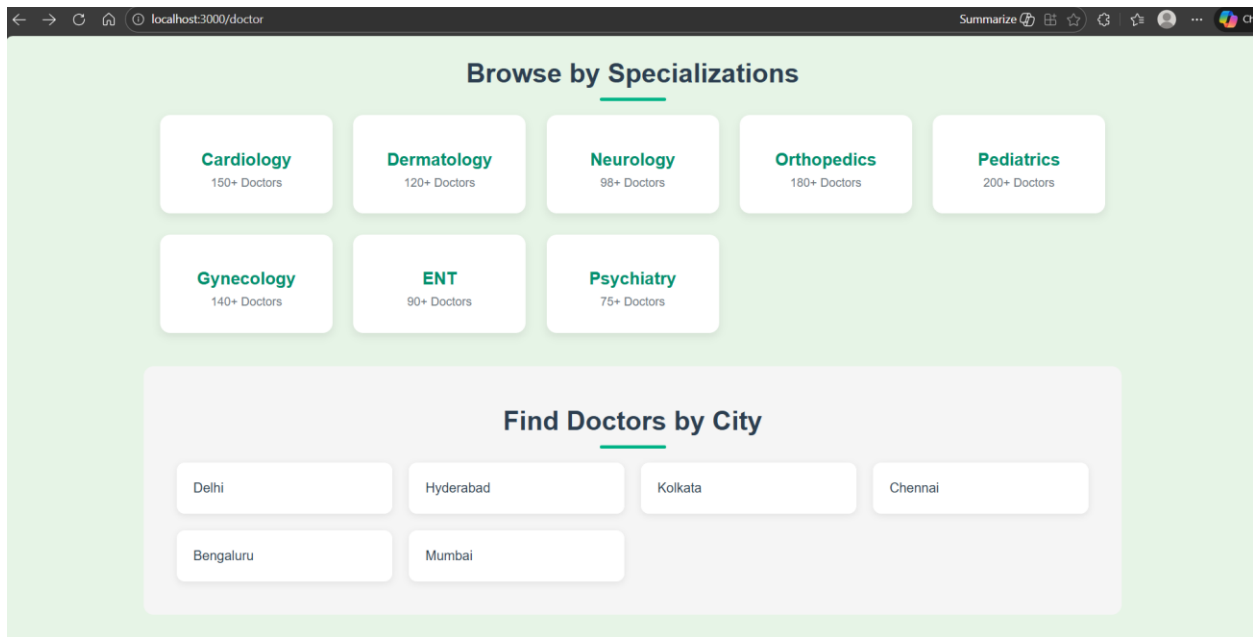

Users can explore different medical specialties like Cardiology, Dermatology, and more. Each card shows available doctors, making it easy to find the right expert instantly.

```
src > components > Doctors > jax > CitiesSection.jsx > ...
1 import CityDropdown from './CityDropdown';
2 import './DoctorStyle/doctor.css';
3
4 export default function CitiesSection() {
5   const cities = [
6     { name: "Delhi", areas: ["Central Delhi", "South Delhi", "North Delhi", "East Delhi"] },
7     { name: "Hyderabad", areas: ["HITECH City", "Banjara Hills", "Secunderabad", "Madhapur"] },
8     { name: "Kolkata", areas: ["Salt Lake", "New Town", "South Kolkata", "Central Kolkata"] },
9     { name: "Chennai", areas: ["Anna Nagar", "Velachery", "Tambaram", "OWR"] },
10    { name: "Bengaluru", areas: ["Whitefield", "Koramangala", "Indiranagar", "JP Nagar"] },
11    { name: "Mumbai", areas: ["Andheri", "Bandra", "Powai", "Thane"] },
12  ];
13
14  return (
15    <section className="cities-section">
16      <h2 className="section-heading">Find Doctors by City</h2>
17
18      <div className="cities-grid-apollo">
19        {cities.map((city, index) => (
20          <CityDropdown key={index} city={city} />
21        ))}
22      </div>
23    </section>
24  );
25 }
26
```
