AP RERA – PROJECT CLOSURE MODULE

Introduction

Today I worked on the **Project Closure Module** in the AP RERA portal. I created the Closure Details page where the application number, project name, and promoter name are displayed, and promoters can upload all the required supporting documents for closing the project. I implemented file upload functionality for all documents and added validation to ensure that all required files are uploaded before submission. After uploading all documents, when the user clicks the submit button, the system shows a successful submission popup. Currently the UI and functionality are completed and aligned with the existing portal design.

The screenshot displays the 'Closure Details' form within the Andhra Pradesh Real Estate Regulatory Authority (AP RERA) portal. The form is titled 'Closure Details' and is located under the 'AP RERA' logo. The form contains several input fields for 'Application No', 'Project Name', and 'Promoter Name'. Below these fields, there is a section for 'Supporting Documents' with a list of required documents and their upload status. The documents listed are: 1. Do you have Occupancy Certificate? (YES/NO), 2. All Sale Deed Copies, 3. Association of Allottees Formation Proof, 4. Common Areas / Amenities Handover Proof, 5. Structural Liability Affidavit (Form F6), and 6. Unsold Units Affidavit (Form F7). Each document has a 'Choose File' button and a 'No file chosen' status. The form is styled with a light blue header and a white body, with a dark blue footer containing navigation links like HOME, ABOUT US, NOTIFICATIONS, REGISTRATION, REPORTS, REGISTERED, JUDGEMENTS/ORDERS, KNOWLEDGE HUB, LOGIN, and AP RERA.

The **Project Closure Module** is developed as part of the **Andhra Pradesh Real Estate Regulatory Authority (AP RERA) portal**. This module allows promoters to submit the required documents to officially close a registered real estate project after completion.

The closure process ensures that all legal, structural, and financial requirements related to the project are fulfilled before the project is marked as closed in the RERA system.

This module enables promoters to upload the necessary documents such as occupancy certificates, sale deed copies, affidavits, and bank statements. After uploading the required documents, the promoter can submit the application through the portal.

The module validates whether all mandatory documents are uploaded before allowing submission. If all documents are uploaded successfully, the system displays a confirmation message indicating successful submission.

WORK UPDATE

Objectives of the Module

Objectives

The main objectives of the **Project Closure Module** are:

1. To provide a simple interface for promoters to close completed projects.
2. To collect all required documents needed for project closure.
3. To ensure compliance with RERA rules and regulations.
4. To maintain transparency in project completion.
5. To store all project closure documents digitally in the portal.

The screenshot displays a web form for submitting a closure request. At the top, there is a text input field for 'Promoter Name'. Below this, a section titled 'Supporting Documents' contains a radio button group for 'Do you have Occupancy Certificate?' with 'YES' selected. A list of eight documents follows, each with a 'Choose File' button and a 'No file chosen' status: 1. Upload Occupancy Certificate, 2. All Sale Deed Copies, 3. Association of Allottees Formation Proof, 4. Common Areas / Amenities Handover Proof, 5. Structural Liability Affidavit (Form F6), 6. Unsold Units Affidavit (Form F7), 7. Consolidated Bank Statement of RERA Designated Bank Account, and 8. Latest Photographs of the Project. A green 'Submit Closure Request' button is located at the bottom of the form.

Key Benefits

- Reduces manual paperwork.
- Ensures legal compliance.
- Provides secure document submission.
- Maintains proper records for regulatory purposes.
- Improves efficiency of project closure process.

Functional Requirements

The following functionalities are implemented in the **Closure Details** page:

1. Display Project Details

The page displays the following project information:

- Application Number

WORK UPDATE

- Project Name
- Promoter Name

These fields are **read-only** and automatically populated from the system database.

2. Document Upload Section

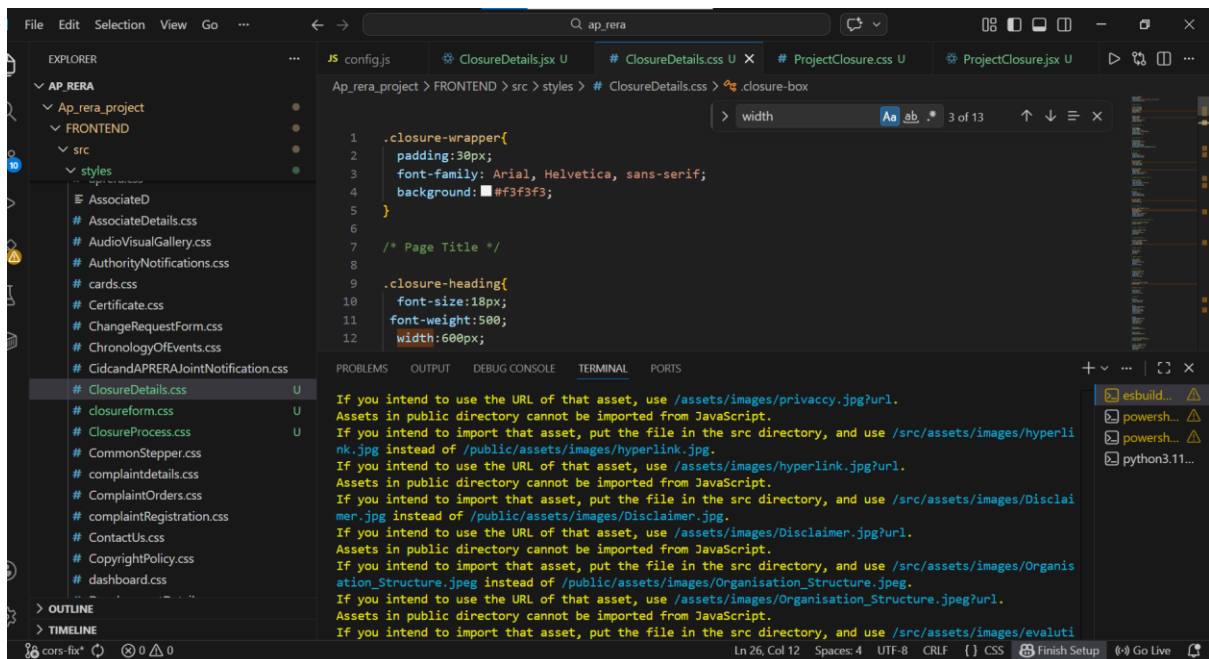

The promoter must upload the following supporting documents:

1. Occupancy Certificate
2. Sale Deed Copies
3. Association of Allottees Document
4. Common Areas / Amenities Handover Document
5. Structural Liability Affidavit (F6)
6. Unsold Units Affidavit (F7)
7. Consolidated Bank Statement
8. Latest Photographs of the Project

Each document has a **file upload option**.

3. File Name Display

Once a document is uploaded, the file name is displayed beside the upload button to confirm the selected file.

WORK UPDATE

Validation and Submission Process

The system validates the uploaded documents before submission.

Validation Rules

The following validations are implemented:

- All required documents must be uploaded.
- Each upload field must contain a file.
- If any document is missing, the system will show an error message.

Example Validation Message

If files are missing:

Please upload all required documents

Successful Submission

If all documents are uploaded correctly and the user clicks **Submit Application**, the system displays the following confirmation message:

Application Submitted Successfully

This confirmation ensures that the application has been successfully recorded in the system.

User Interface Design

The user interface of the **Closure Details module** is designed to match the layout and styling of the AP RERA portal.

UI Components

1. Page

Displays the page title:

Closure Details

2. Project Information Section

A grey background section containing:

- Application Number
- Project Name

WORK UPDATE

- Promoter Name

3. Supporting Documents Section

Contains a list of required documents with file upload options.

Each document row contains:

- Document Name
- Upload Button
- Uploaded File Name

4. Action Buttons

At the bottom of the page two buttons are available:

Reset Button

- Clears all uploaded files.

Submit Application Button

- Submits the closure application.

Button colors follow the AP RERA design:

- Reset → Grey
- Submit Application → Blue

Technology Used

The module is developed using modern web technologies.

Frontend Technologies

React.js

- Used to create reusable UI components.
- Handles dynamic user interactions.

CSS

- Used for styling the user interface.
- Ensures alignment with AP RERA portal design.

React Features Used

WORK UPDATE

- useState Hook – for managing uploaded file data.
- Event Handling – for file uploads.
- Conditional Rendering – for validation and messages.

Future Enhancements

Possible improvements include:

- Backend integration for file storage.
 - File type validation (PDF, JPG, PNG).
 - Maximum file size validation.
 - Download option for uploaded documents.
 - Progress indicators for uploads.
 - Secure document storage.
-
