

WORK UPDATE

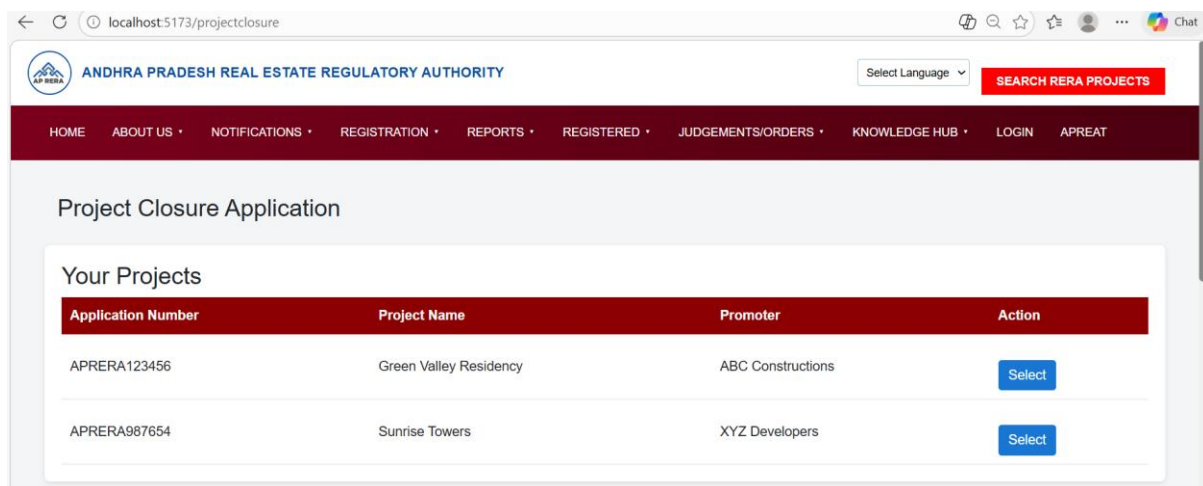

Name : D Sri Ramya

Date :10-3-2026

Overview

Today I worked on the Project Closure module in the AP RERA portal. After builder login using OTP, the system displays the list of application numbers associated with the builder. When the builder selects an application number, the project details such as project name, application number, and promoter name are fetched automatically. After that, the closure form is displayed where the builder can enter completion percentage, upload Excel for completed flats, upload project images, Form-1 and Form-2 documents, and provide OC certificate details before submitting the closure request to the admin for approval.

The **Project Closure Module** is part of the Andhra Pradesh Real Estate Regulatory Authority (AP RERA) portal. This module enables registered builders or promoters to submit a request for closing a registered real estate project once construction reaches a certain level of completion.

The system allows the builder to log in securely, view their registered project application numbers, select the project they intend to close, and submit a closure request along with supporting documents and completion details.

This module ensures transparency and proper verification by allowing the AP RERA administrative team to review submitted closure requests before approving or rejecting them.

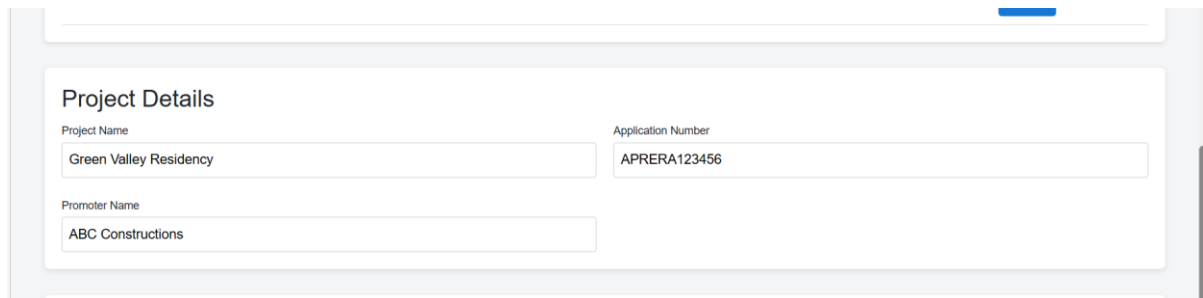

Objective

The main objective of the Project Closure Module is to:

- Allow builders to request project closure through the portal.
- Collect required project completion information.

WORK UPDATE

- Upload necessary certificates and supporting documents.
- Provide a structured approval workflow for AP RERA administrators.

The screenshot shows a 'Project Details' form. It contains three input fields: 'Project Name' with the value 'Green Valley Residency', 'Application Number' with the value 'APRERA123456', and 'Promoter Name' with the value 'ABC Constructions'.

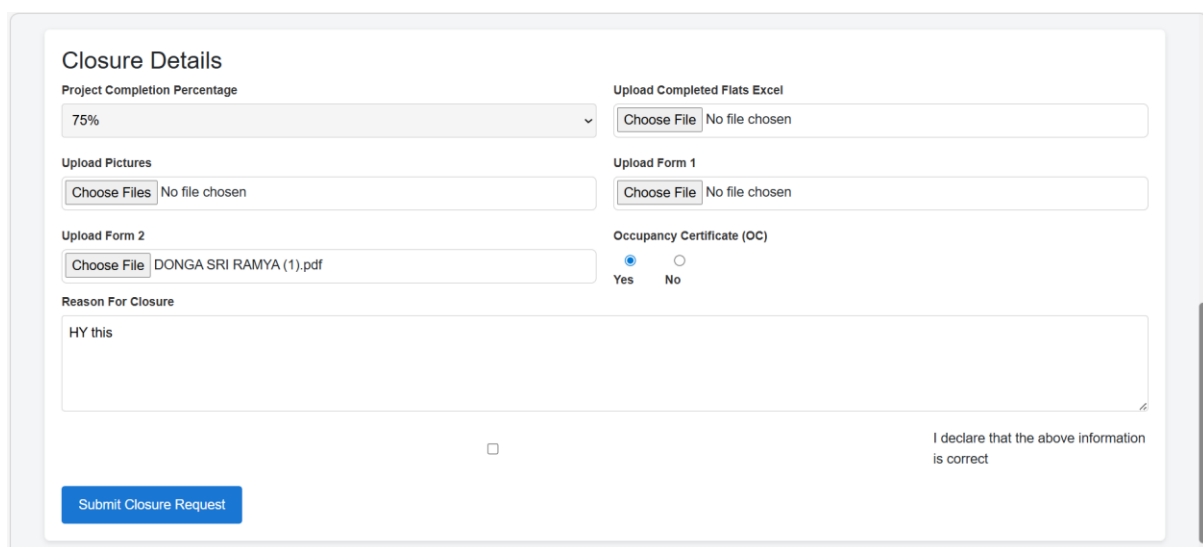

Users of the Module

The module involves two main users:

Builder / Promoter

The builder can:

- Login using email and OTP verification.
- View their registered project application numbers.
- Select the project they want to close.
- Fill the closure application form.
- Upload documents and submit the request.

The screenshot shows a 'Closure Details' form. It includes several sections: 'Project Completion Percentage' with a dropdown set to '75%'; 'Upload Completed Flats Excel' with a 'Choose File' button and 'No file chosen' text; 'Upload Pictures' with a 'Choose Files' button and 'No file chosen' text; 'Upload Form 1' with a 'Choose File' button and 'No file chosen' text; 'Upload Form 2' with a 'Choose File' button and the filename 'DONGA SRI RAMYA (1).pdf'; 'Occupancy Certificate (OC)' with 'Yes' and 'No' radio buttons, where 'Yes' is selected; and a 'Reason For Closure' text area containing the text 'HY this'. At the bottom, there is a checkbox, a blue 'Submit Closure Request' button, and a declaration: 'I declare that the above information is correct'.

AP RERA Admin

The administrator can:

- View closure requests submitted by builders.

WORK UPDATE

- Verify uploaded documents and project details.
 - Approve or reject the closure request.
-

System Workflow

Builder Login Process

The builder accesses the AP RERA portal and logs into the system using their registered email ID.

Steps

1. Builder enters their email address.
2. The system sends an OTP to the registered email.
3. Builder enters the OTP for verification.
4. After successful OTP verification, the builder is logged into the dashboard.

Viewing Registered Projects

Once logged in, the builder can view a list of all projects registered under their account.

The system displays the following information:

Field	Description
Application Number	Unique project registration number
Project Name	Name of the registered project
Promoter Name	Builder or promoter name
Action	Button to select the project

The builder selects the desired project by clicking the **Select** button.

Fetching Project Details

After selecting a project, the system automatically fetches project information from the database and displays it in the form.

Displayed details include:

- Project Name
- Application Number

WORK UPDATE

- Promoter Name

These fields are automatically populated and are read-only.

Closure Form Details

After project details are fetched, the **Closure Form** is displayed below the project information.

The builder must fill in the required details to submit a closure request.

Project Completion Percentage

The builder selects the completion level of the project.

Available options:

- 50%
- 75%
- 100%

This value indicates the construction progress of the project.

Completed Flats Excel Upload

The builder uploads an Excel file containing details of completed flats.

Example structure:

Flat Number Status

A101 Completed

A102 Completed

A103 Completed

This helps the authority verify the number of completed units.

Uploading Project Images

Builders are required to upload images of the project site to provide visual confirmation of construction progress.

Examples:

- Site images

WORK UPDATE

- Completed flats
- Infrastructure photos

Uploading Required Certificates

Builders must upload the following documents:

Form 1 Certificate

A document confirming financial and project-related information.

Form 2 Certificate

A certificate validating project completion and compliance.

These documents must be uploaded in PDF format.

Occupancy Certificate (OC)

The builder must specify whether the Occupancy Certificate is available.

Options:

- Yes
- No

This certificate confirms that the building is ready for occupancy.

Submission and Admin Approval

Declaration

Before submitting the closure request, the builder must accept a declaration confirming that all submitted information is correct.

Example declaration:

"I declare that the above information is true and correct to the best of my knowledge."

The builder must check the declaration checkbox before submission.

Submission Process

After completing the form and uploading all required documents, the builder clicks the **Submit Closure Request** button.

The system then performs the following actions:

1. Stores the submitted data in the database.

WORK UPDATE

2. Saves uploaded files and documents.
3. Generates a closure request entry.
4. Sends the request to the AP RERA administrative dashboard.

The request status is marked as:

Pending

Admin Verification

AP RERA administrators review submitted closure requests through the admin dashboard.

The admin panel displays:

Application Number	Project Name	Promoter	Status	Action
--------------------	--------------	----------	--------	--------

Admin actions include:

- View submitted details
- Verify uploaded documents
- Approve closure request
- Reject closure request

Approval Outcome

If Approved

- Project status is updated to **Closed**.
- Builder receives confirmation of project closure.

If Rejected

- Admin provides a reason for rejection.
- Builder can review the comments and resubmit if necessary.
