APARNA KONGARI

Email Id: aparnakongari70@gmail.com

Phone: +917036291352

CAREER OBJECTIVE:

Being a technology driven professional with 4 years of experience in the field of Telecom engineer in a dynamic environment with inherent skills and acquired practical knowledge. To be a part of an organization offering excellent opportunity in terms of exercising my professional knowledge and skill to the fullest potential and grow along with the organization. I am eager to work in such type of environment where my all-round performance and hard work will noticed.

PROFESSIONAL EXPERIENCE:

Centillion Networks Pvt Ltd – Design Engineer

Duration: 2024 - Present

- **Project Name:** BEEEXACT
- **Client** : BEEEXACT Italy.
- **Application** : Q-GIS, Google Earth, Geostruct.
- **Role** : Production, QC,QA.

Project description:

- **Task 1 :Beexact HLD Design** : This is a HLD (High level design) design project. The scope of the project is to provide fiber connectivity to all subscribers available in the specified location. We perform this task in IMS Tool. The inputs are provided by client are Subscribers, Trenches and CP/AP.

- **Task 2 :Trenches and Address Validation** : In this we have to draw cover trenches on HLD of Polygons in QGIS as well as ISRI ArcGIS portal

Here, We have to collect data through mobile mapping like as real time assets through client source.

Roles &Responsibilities:

- Giving quality training and feedback to new joining members in the organization.
- Having work Experience in Quality Department as a QC & QA Employee.
- Involved in client final data delivery process.

Cyient. – Design Specialist

Duration: May 2021 – 2024

Project :

- **Project Name:** ROCK NETWORKS
- **Client** : Rock Networks Canada
- **Application** : Auto Cad & QGIS.
- **Role** : PRODUCTION, QC (pole loading analysis)..

Project description:

Scope Of This Project Is To Provide The Next Generation Passive Optical Network (XGS-PON) Is A Fibre-To-The-Home Technology (FTTH) That Extends Optical Access Across The Network To Subscribers, Using Fibre Optic Cabling To Provide Data Services. As Per Client Confirmation We Have To Plan 90% Aerial & 10%UG (Underground) Whenever There Is No Possibility For Proposing Aerial Network.

Pole Load Analysis

Conducted comprehensive pole load analysis to assess structural integrity and ensure compliance with safety standards. Utilized advanced modeling software to evaluate load distributions and optimize pole design for various applications. Delivered accurate, actionable insights that contributed to enhanced stability and performance in infrastructure projects.

Project :

- **Project Name:** DG (Deutsche Glasfaser)
- **Client:** Recognize.
- **Role:** Address validation (CSV), Trenches QC-QA
- **Application:** QGIS, ESRI, Orbit

Description: Worked for DG project which belongs to VWT client. In DG project we have 3 scopes 1) CSV 2) Trenches 3) HLD

Scope 1: In csv we do address validation, mainly we place the address points and describe them whether it belongs to commercial or residential. And update it with the number of families or the commercial type so that the number of connections required for address points is identified.

Scope 2: In this scope we do estimate and plan of trenches for fiber passing and do analysis which route is more economical and best for trenching. We do this on a sample template shape file in QGIS software by using ESRI and ORBIT publication tools provided by client.

Scope 3: in this HLD scope. High level designing is done up to the address points. Garden trenches are placed in HLD, we place distribution point and pop for an area. D-ducts and F-ducts are described in this process. All these processes are done in geo-struct application

COMPUTING ABILITY:

- Geostruct, QGIS, IKE, Quick Pole, Auto CAD, ESRI, Orbit, Street Smart.
- C, C++ Programming language
- MS-OFFICE

EDUCATIONAL QUALIFICATION:

Qualification	Institute/ university	Year of passing	CGPA/percentage
BSc(mpcs)	Sri Nava Bharath Degree & Pg college	2020	90%
Intermediate	Sri Prathibha junior college	2017	66%
SSC	ZPHS, Raghunathpur	2014	85%

ACHIEVEMENTS:

- Awarded as Top Performer among the Team for achieving the target before the timeline.
- Most valuable performer bronze-Team

STRENGTHS:

- Hard working, Self-Confident
- Quick learner and Active listener
- Being Positive , Staying Calm In difficult situation
- A team player with leadership qualities. Easy adaptability to the situation can work independently or be a part of the team.

DECLARATION:

I here by declare that the information furnished above is true to the best of my knowledge.
