

WORK UPDATE

Name: D Sri Ramya

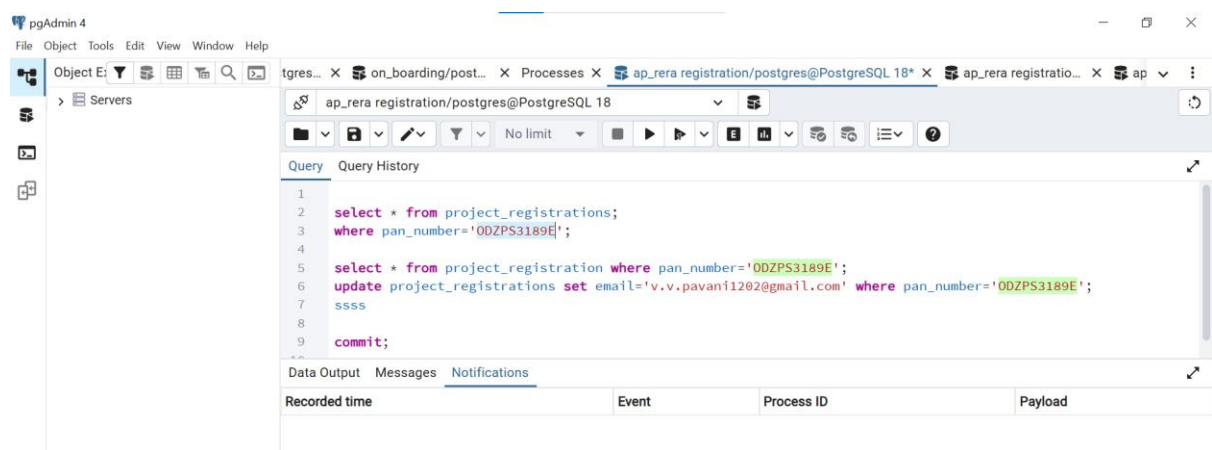

Date:24-2-2026

Project Overview & Objective

1. Introduction

This document provides a detailed work update on the development and UI enhancement of the APREAT Contact Us page. The objective of this task was to design and implement the Chairperson, Members, and Registrar sections to match the reference layout exactly as provided.

The implementation was carried out using React JS for component structure and CSS for styling and layout adjustments.

2. Task Objectives

The primary objectives of this task were:

- To create structured sections for Chairperson, Members, and Registrar.
- To design tables with proper alignment and borders.
- To match the UI with the reference image layout.
- To ensure proper spacing, padding, and header styling.
- To fix image path issues and display official photos correctly.

The focus was on achieving pixel-level UI consistency and professional presentation.

UI Development & Styling Implementation

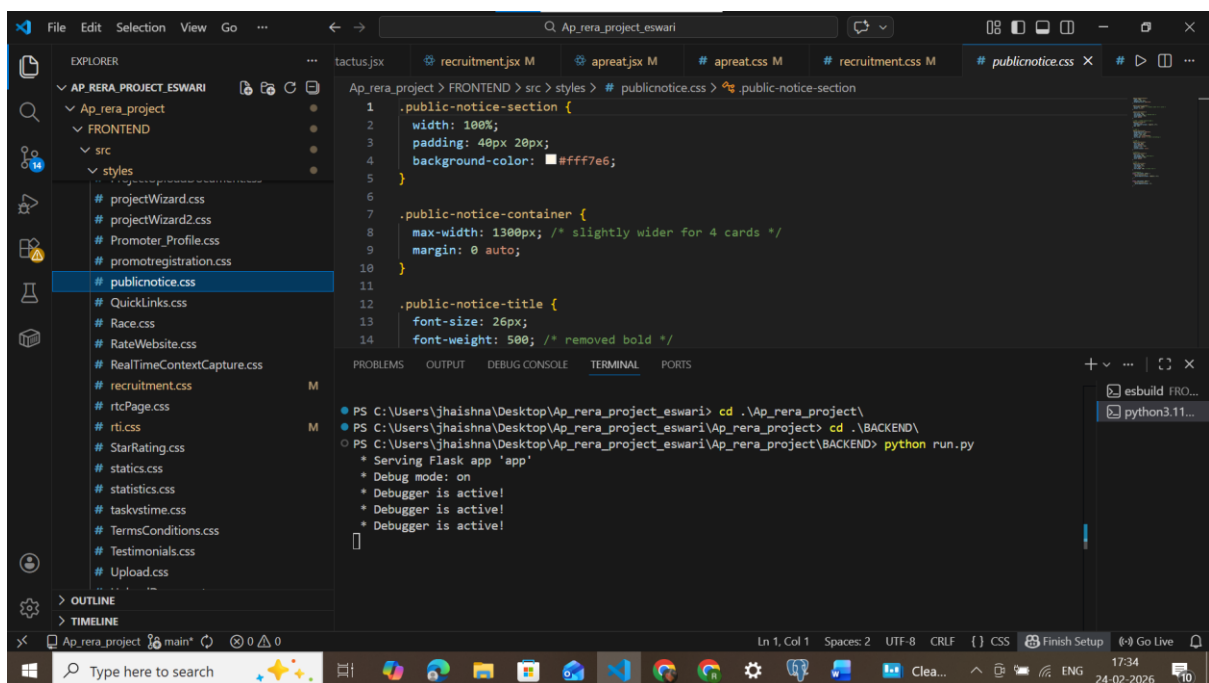

3. Layout Implementation

WORK UPDATE

The APREAT page was structured using a main wrapper container with controlled width and centered alignment. The following improvements were made:

- Added breadcrumb section with blue background.
- Implemented section titles with underline styling.
- Created consistent table headers with dark background color.
- Applied uniform padding and border styling.
- Ensured equal column spacing for all sections.

The layout now follows a consistent pattern across all sections.

4. Table Styling Enhancements

To match the reference design:

- Table headers were styled with dark grey background and white text.
- Borders were applied uniformly to all table cells.
- Vertical alignment was adjusted for better readability.
- Name column was left-aligned for clarity.
- Photo column was centered and resized appropriately.

Spacing between sections was standardized to maintain visual consistency.

WORK UPDATE

Image Integration & Data Updates

5. Image Handling

The following updates were completed regarding images:

- Corrected image path usage (using /assets/images/ instead of relative public paths).
- Added Chairperson photo.
- Added Judicial Member photo.
- Added Registrar (Sri Guduri Rama Krishna) photo.
- Applied fixed width, height, and object-fit styling for uniform image size.
- Added border styling around images for clean presentation.

All images are now properly aligned within the table cells without distortion.

6. Data Integration

Updated official details including:

- Chairperson mobile number.
- Judicial Member mobile number.
- Registrar official email ID.
- Replaced placeholder values with accurate information.

All information is displayed clearly within structured table format.

In today's update, I focused on improving the overall structure and responsiveness of the APREAT Contact page. I reorganized the component layout for better readability, optimized the CSS to maintain consistent spacing across sections, and ensured the tables render properly on different screen sizes. I also validated the data display and confirmed that all sections load correctly without UI breaks. The page is now stable, clean, and ready for further integration if required.
