

WORK UPDATE

DATE: 12-02-2026

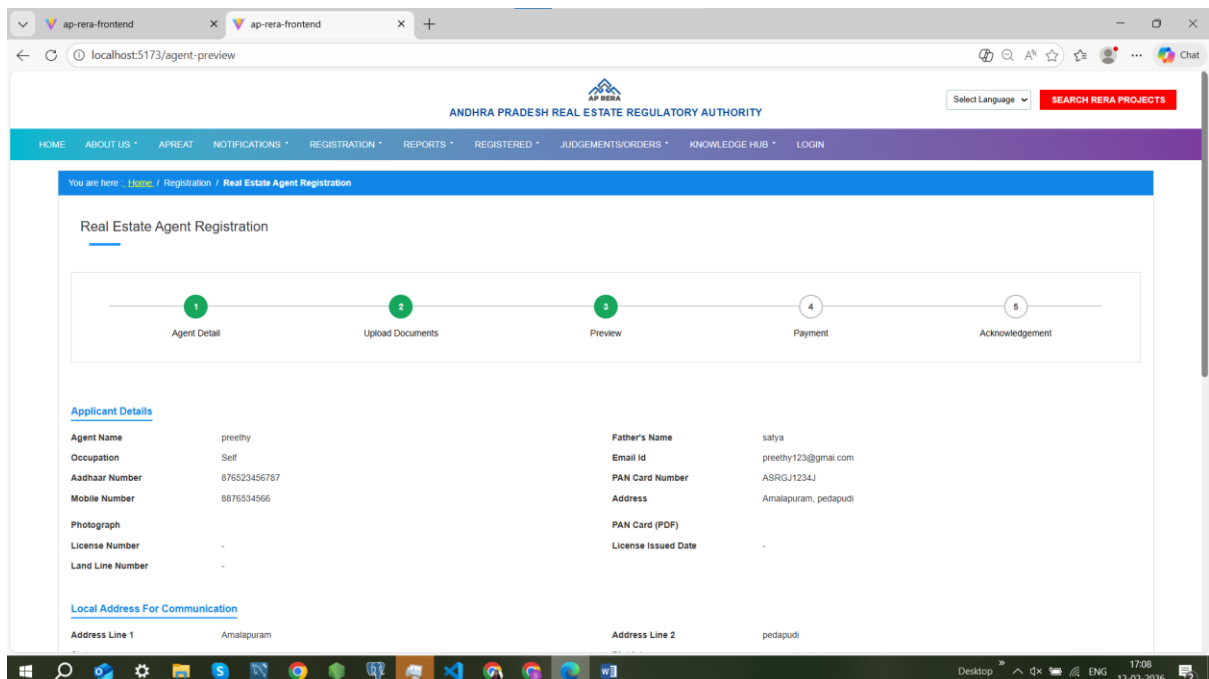

NAME: K LAKSHMI SANTHI

SHIFT: GENERAL SHIFT

TIMINGS: 9:00AM-6:00PM

TODAY WORK UPDATE:

Today I worked on the **Agent Registration module (Individual case)** with a special focus on the **Preview page**. On the preview page, several details such as Photograph, PAN Card (PDF), License Number, License Issued Date, Landline Number, Local Address for Communication (Address Line 1 – Amalapuram, Address Line 2 – Pedapudi, State, District, Mandal, Village, PIN Code – 55240), Address Proof, Other Details, Last 5 Years Projects (No), and Any Civil/Criminal Cases (No) were added on the frontend, but the corresponding data was not being fetched from the backend. We are currently working on resolving this issue with backend support to ensure proper data binding and display in the preview section.

Designed and Developed by [APOnline](#)

In addition, I created and configured new database tables for **State, District, Mandal, and Village**, and established the necessary joins in the database. I also created new tables for **Projects, Litigations, and Other States** as part of the registration process and integrated them with the module. On the Preview page, I worked on implementing **Email OTP verification**, where the user receives an OTP via email, verifies it successfully, and then proceeds to the Payment page.

pgAdmin 4

CRLF Ln 1, Col 64

Another requirement I worked on is improving the **Stepper navigation functionality**. When clicking on Agent Details, it should redirect to the Applicant Details page; clicking on Upload should redirect to the Upload page; and clicking on Preview should redirect to the Preview page. Currently, when navigating between steps, the entered data is getting lost, so I am working on implementing proper data persistence to ensure the data is saved and retained while moving between steps.

The screenshot shows the 'Real Estate Agent Registration' page at the first step, 'Agent Detail'. The breadcrumb trail is 'You are here: Home / Registration / Real Estate Agent Registration'. A progress bar at the top indicates five steps: 1. Agent Detail (active), 2. Upload Documents, 3. Preview, 4. Payment, and 5. Acknowledgement. Below the progress bar, the 'Agent Type' section has a radio button selected for 'Individual' and an option for 'Other than Individual'. The 'Applicant Details' section contains several form fields: 'Agent Name *', 'Upload Photograph (JPG) *' (with 'Choose File' and 'No file chosen' buttons), 'Father's Name *', 'Occupation *' (a dropdown menu), 'Email Id *', 'Aadhaar Number *', 'PAN Card Number *', 'Upload PAN Card (PDF) *' (with 'Choose File' and 'No file chosen' buttons), 'Mobile Number *', 'Land Line Number', 'License Number by local bodies', and 'License Issued Date' (with a date picker showing 'dd-mm-yyyy'). The browser's address bar shows 'localhost:5173/applicant-details'.

The screenshot shows the 'Real Estate Agent Registration' page at the second step, 'Upload Documents'. The breadcrumb trail is 'You are here: Home / Registration / Real Estate Agent Registration'. The progress bar now shows step 2 as active. The main form area has a table with three columns: 'Document Name', 'Upload Document', and 'Uploaded Document'. There are three rows for 'Income Tax Return - Year 1 *', 'Income Tax Return - Year 2 *', and 'Income Tax Return - Year 3 *'. Each row has a 'Choose File' button and 'No file chosen' text in the 'Upload Document' column, and an empty space in the 'Uploaded Document' column. Below the table, there is a checkbox labeled 'I / We solemnly affirm that the above information is correct'. At the bottom left is a 'Back' button, and at the bottom right is a 'Save And Continue' button. The browser's address bar shows 'localhost:5173/agent-upload-documents'.

Summary:

Worked on Agent Registration (Individual) Preview page enhancements, backend data integration issues, database table creation and joins, OTP verification implementation, and stepper navigation improvements to prevent data loss.
