

WORK UPDATE

DATE: 13-02-2026

NAME: K LAKSHMI SANTHI

SHIFT: GENERAL SHIFT

TIMINGS: 9:00AM-6:00PM

TODAY WORK UPDATE:

Today I worked on the **Agent Registration (Individual) module**, with major focus on completing the **Preview page**. I have successfully completed both the frontend and backend integration for the Agent Preview page, ensuring that all required fields are properly displayed and mapped with the database. I verified the data flow from backend APIs to the frontend and ensured the preview section reflects the submitted agent details accurately.

In addition, I created and configured new database tables for **State, District, Mandal, and Village**, and established the necessary joins in the database. I also created new tables for **Projects, Litigations, and Other States** as part of the registration process and integrated them with the module. On the Preview page, I worked on implementing **Email OTP verification**, where the user receives an OTP via email, verifies it successfully, and then proceeds to the Payment page.

Servers > PostgreSQL 17 > Databases > Ap_rera_t > Schemas > public > Tables > agentregistration_details_t

Another requirement I worked on is improving the **Stepper navigation functionality**.

When clicking on Agent Details, it should redirect to the Applicant Details page; clicking on Upload should redirect to the Upload page; and clicking on Preview should redirect to the Preview page. Currently, when navigating between steps, the entered data is getting lost, so I am working on implementing proper data persistence to ensure the data is saved and retained while moving between steps.

Summary:

Completed Agent Preview page (frontend + backend), enhanced CSS styling, working on fixing print data visibility issue, and improving stepper navigation with proper data persistence.
