

WORK UPDATE

Name : D Sri Ramya

Date :21-3-2026

Today I worked on the Project Closure module where I implemented OTP-based login with PAN validation and OTP verification. I also developed the closure form with conditional fields and file upload validations, including restricting PDFs and images. Additionally, I improved the UI alignment for radio buttons and file inputs. Currently, the frontend is completed and working, and I am testing validations and API integration.

Project Closure Module with OTP Authentication

This module is developed to facilitate the closure process of a project by collecting required documents and verifying user identity through OTP-based login. The system ensures secure access and structured submission of mandatory documents as per RERA guidelines.

The module consists of two major components:

- OTP-based Promoter Login
- Project Closure Form Submission

The objective is to provide a user-friendly interface where promoters can log in securely and upload all necessary documents for project closure.

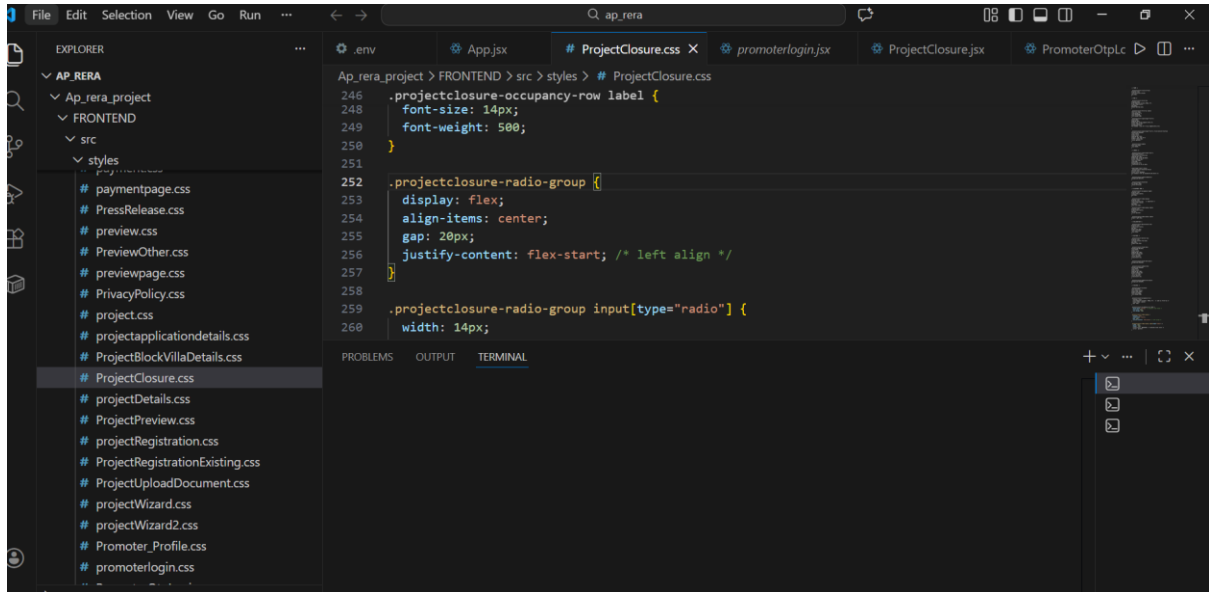

OTP Login Module

The OTP Login module is designed to authenticate promoters using their PAN number.

Key Features:

- PAN validation using regex format
- OTP generation via API
- OTP verification process
- Resend OTP functionality
- Error and success message handling
- Popup for invalid PAN input

WORK UPDATE

Workflow:

1. User enters PAN number
2. System validates PAN format
3. OTP is sent to registered email
4. User enters OTP
5. System verifies OTP and redirects to next page

This ensures only authorized users can access the closure form.

Project Closure Form

The Project Closure form collects all required documents for project completion.

Main Fields:

1. Occupancy Certificate (Yes/No)
2. Upload Occupancy Certificate (conditional)
3. Sale Deed Copies
4. Association of Allottees Proof
5. Common Areas Handover Proof
6. Structural Liability (F6)
7. Unsold Units Affidavit (F7)

WORK UPDATE

8. Bank Statement

9. Project Photographs

Dynamic Behavior:

- File upload appears only if "YES" is selected
 - Mandatory fields are validated before submission
-

Validation & UI Enhancements

Validation Implemented:

- PAN format validation
- OTP length validation (6 digits)
- Mandatory file upload checks
- File type restrictions:
 - PDF only for documents (1–7)
 - Images only for photographs (8)

UI Improvements:

- Proper alignment of radio buttons (YES/NO)
- Styled file upload buttons
- Spacing and layout corrections
- Section-wise structured design
- Clean card layout with borders

These enhancements improve usability and user experience.
