

Daily Status Report

Name : M. Eswari

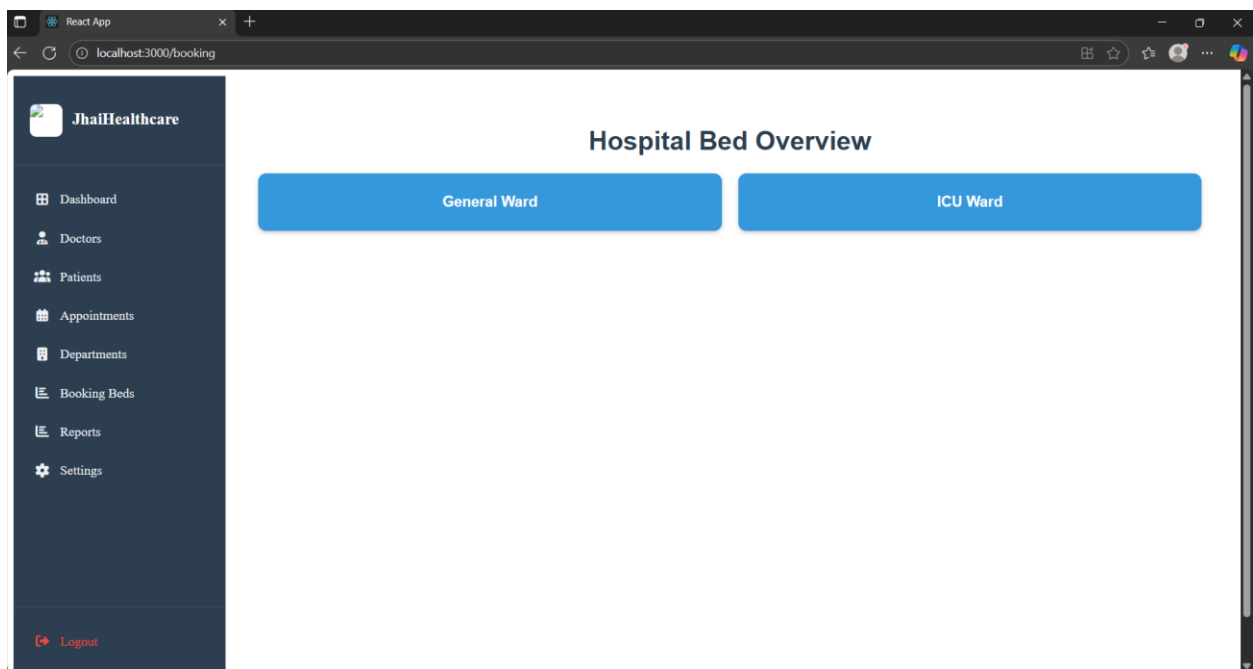

Date : 16-10-2025

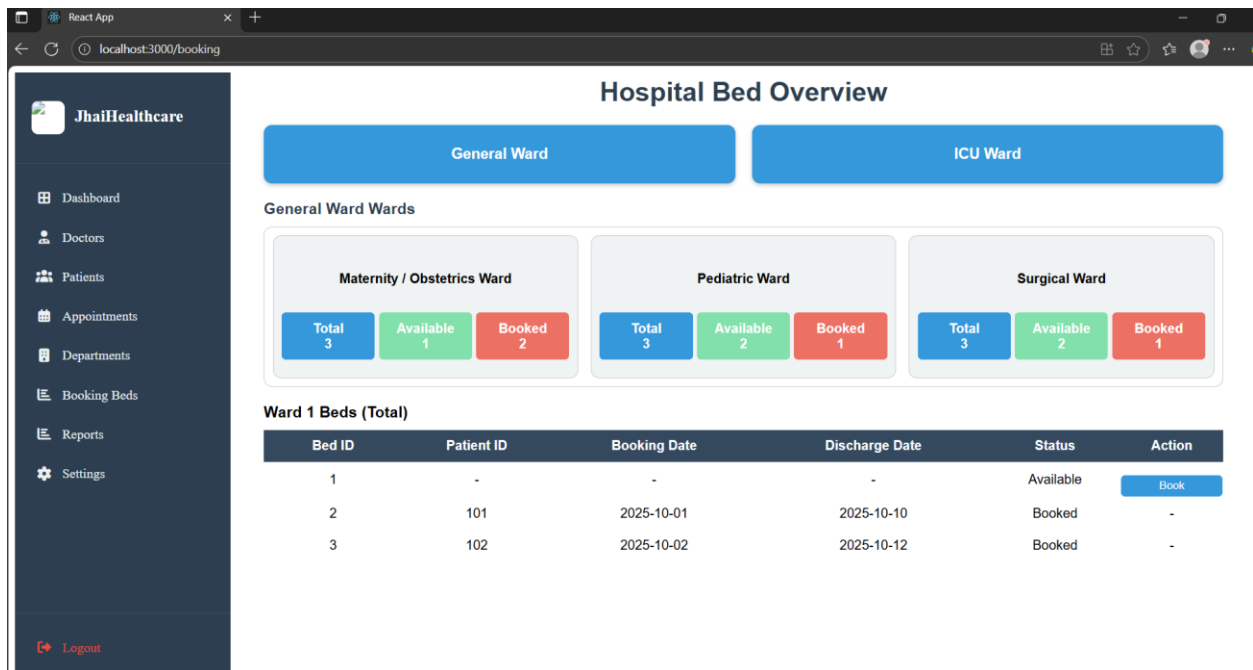

Today I worked on the Helathcare Project , Hospital Bed Booking application where the admin manages all patient bed allocations. I implemented main ward blocks like General Ward and ICU that display nested wards in a grid format. I added clickable blocks for each ward showing total, available, and booked beds to filter detailed bed information. I also worked on the table below each ward to display bed ID, patient details, dates, status, and a booking action for available beds.

```
177 import React, { useState } from "react";
178
179 // Mock data
180 const wardBlocks = [
181   {
182     id: 1,
183     name: "General Ward",
184     wards: [
185       {
186         id: 1,
187         name: "Ward 1",
188         beds: [
189           { bedId: 1, patientId: null, bookingDate: null, dischargeDate: null, status: "Available" },
190           { bedId: 2, patientId: 101, bookingDate: "2025-10-01", dischargeDate: "2025-10-10", status: "Booked" },
191           { bedId: 3, patientId: 102, bookingDate: "2025-10-02", dischargeDate: "2025-10-12", status: "Booked" },
192         ],
193       },
194       {
195         id: 2,
196         name: "Ward 2",
197         beds: [
198           { bedId: 4, patientId: null, bookingDate: null, dischargeDate: null, status: "Available" },
199           { bedId: 5, patientId: 103, bookingDate: "2025-10-03", dischargeDate: "2025-10-13", status: "Booked" },
200           { bedId: 6, patientId: null, bookingDate: null, dischargeDate: null, status: "Available" },
201         ],
202       },
203       {
204         id: 3,
205         name: "Ward 3",
206         beds: [
207           { bedId: 7, patientId: 104, bookingDate: "2025-10-05", dischargeDate: "2025-10-15", status: "Booked" },
208           { bedId: 8, patientId: null, bookingDate: null, dischargeDate: null, status: "Available" },
209           { bedId: 9, patientId: null, bookingDate: null, dischargeDate: null, status: "Available" },
210         ],
211       },
212     ],
213   },
214 ];
```

```
1 .booking-page {
2   padding: 20px;
3   font-family: Arial, sans-serif;
4 }
5
6 .page-title {
7   font-size: 28px;
8   margin-bottom: 20px;
9 }
10
11 /* ward blocks row */
12 .ward-blocks-container {
13   display: flex;
14   gap: 20px;
15   flex-wrap: wrap;
16   margin-bottom: 20px;
17 }
18
19 .ward-block {
20   flex: 1;
21   min-width: 200px;
22   background-color: #f4f4f4;
23   color: white;
24   border-radius: 10px;
25   padding: 15px;
26   text-align: center;
27   cursor: pointer;
28   transition: transform 0.2s, box-shadow 0.2s;
29 }
30
31 .ward-block:hover {
32   transform: translateY(-3px);
33   box-shadow: 0 4px 12px rgba(0,0,0,0.3);
34 }
35
```

Also modified the Patient Registration page to improve data entry and ensure proper integration with the backend. The form now captures all patient details and links correctly to the bed booking system.

The screenshot shows the 'Add Patient' form. It includes the following fields: Patient ID, Full Name, Aadhar Number, Phone Number, Date of Birth (mm/dd/yyyy), Select Gender (dropdown), Doctor Id, Diseases, and Address. A blue 'Add Patient' button is at the bottom.
