

Today Work Update

Date:13-04-2026

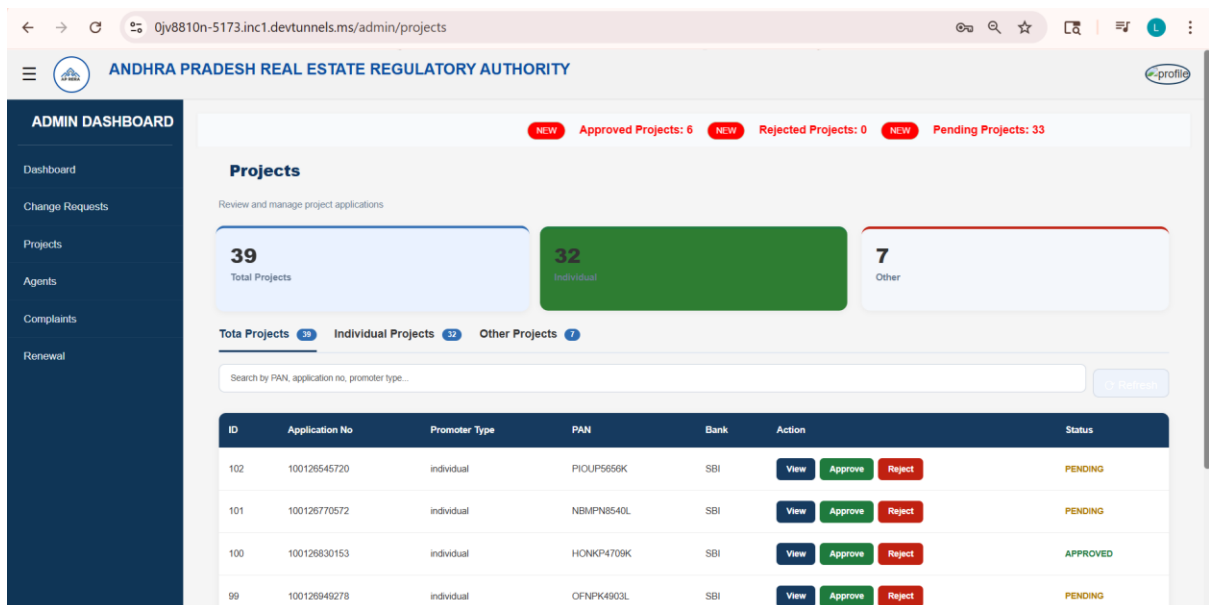

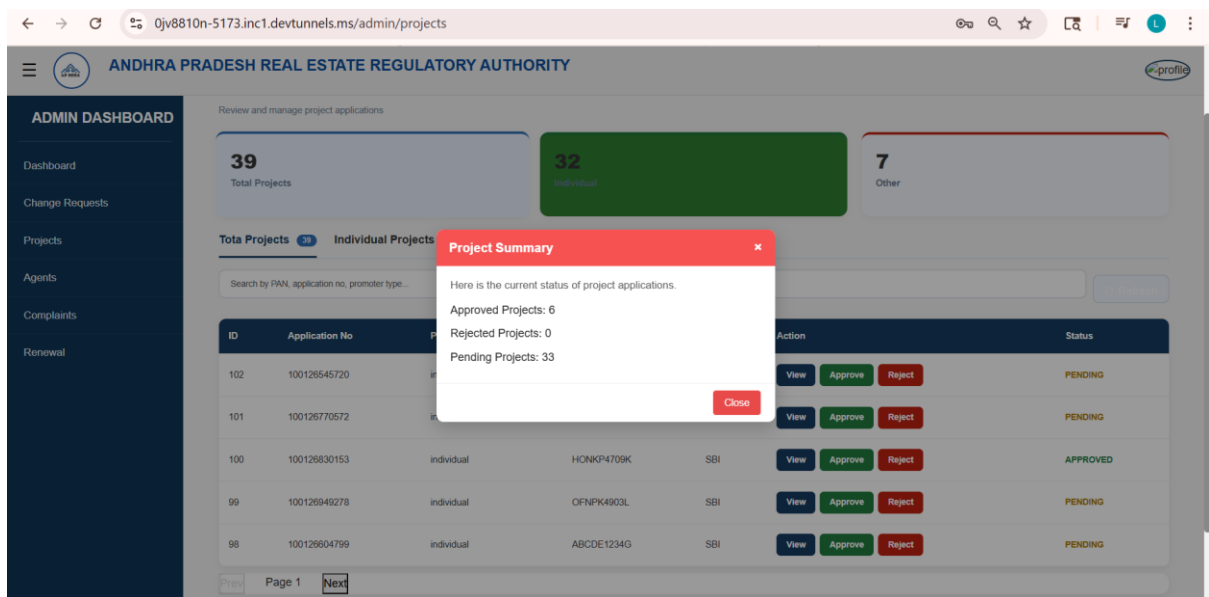

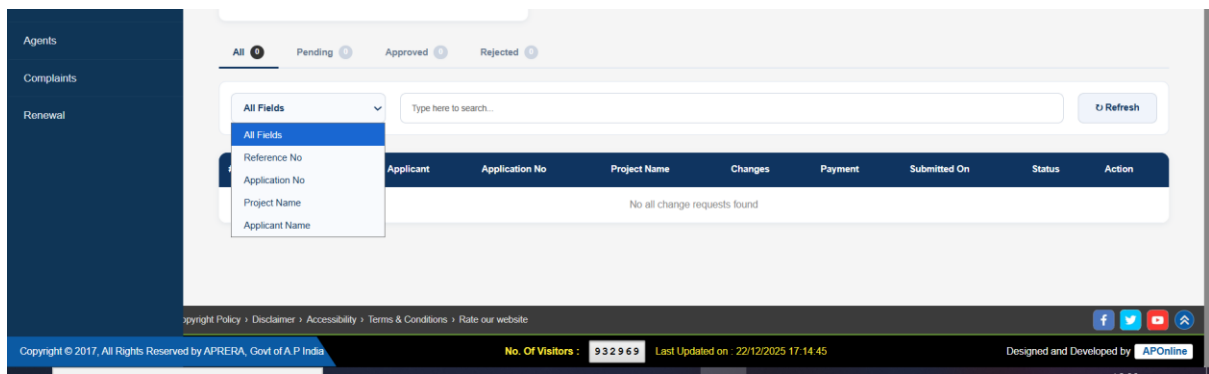

Name: B. Lasya Priya

In this document, I have performed detailed testing on all the fields displayed within the images to ensure their proper functionality. Each field was tested using both valid and invalid inputs to check whether the system correctly accepts appropriate data and rejects incorrect data. I verified that all mandatory fields are enforcing input requirements and that proper validation messages are displayed when incorrect or incomplete data is entered. Additionally, I checked whether the data entered in each field is being saved and reflected accurately in the system.

During testing, I also focused on field behavior such as input formats, character limits, dropdown selections, and file upload functionality wherever applicable. In some cases, I observed issues like fields accepting invalid data, missing or incorrect validation messages, and inconsistent behavior in certain sections. I also checked whether error messages are user-friendly and clearly guide the user to correct the mistakes.

Overall, this testing helped in identifying functional gaps and bugs in the image-based fields. These findings are useful for improving data accuracy, validation handling, and overall user experience in the application.

Summary:

Overall, I tested all the fields present in the images using both valid and invalid inputs to verify their functionality, validations, and error handling. Most fields are working correctly, but some issues were identified such as improper validations, incorrect data acceptance, and missing or unclear error messages. This testing helped in identifying bugs and improving the overall accuracy and user experience of the application.

*****Thank You*****
