

Daily Status Report

Name : M. Eswari

Date : 24-10-2025

Today, I enhanced the healthcare project by adding a sidebar and header with new features and creating an Admin Settings page with modification fields. I also improved the Appointments page layout and functionality for a smoother user experience.

The **Sidebar** is a collapsible navigation panel containing links to all major sections of the app. It opens and closes using the hamburger button, shifting the main content accordingly, and highlights the active page for better orientation. This improves navigation and overall user experience by keeping the interface organized and accessible.

```
src > components > Sidebar > Sidebar.jsx > ...
91 import React, { useState } from 'react';
92 import { Link } from 'react-router-dom';
93 import './Sidebar.css';
94 import logo from '../assets/logo.png';
95
96 const Sidebar = ({ activePage, onNavigate, onLogout, isOpen, toggleSidebar }) => {
97
98   // close sidebar when a link is clicked
99   const handleLinkClick = (callback) => {
100     if (toggleSidebar) toggleSidebar(); // Close sidebar
101     if (callback) callback();
102   };
103
104   return (
105     <>
106       <div className="hamburger" onClick={toggleSidebar}>
107         <div className="line"></div>
108         <div className="line"></div>
109         <div className="line"></div>
110       </div>
111
112       <div className={`sidebar ${isOpen ? 'open' : ''}`>
113         <div className="close-btn" onClick={toggleSidebar}>
114           <div className="line"></div>
115         </div>
116
117         <div className="logo-section">
118           <img src={logo} alt="logo" style={{ width: '50px', borderRadius: '50%' }} />
119           <h2>JhaiHealthcare</h2>
120         </div>
121
122       </div>
123     </>
124   );
125
126   </div>
127 }
```

```
1  /* Hamburger Button */
2  .hamburger {
3    position: fixed;
4    top: 15px;
5    left: 15px;
6    width: 30px;
7    cursor: pointer;
8    z-index: 1001;
9  }
10 .hamburger .line {
11   width: 100%;
12   height: 4px;
13   background: #007bff; /* Healthcare blue */
14   margin: 5px 0;
15   border-radius: 2px;
16 }
17
18 /* Sidebar */
19 .sidebar {
20   position: fixed;
21   left: -260px; /* Hidden by default */
22   top: 0;
23   width: 260px;
24   height: 100%;
25   background: #e7f2ff;
26   color: #000000;
27   transition: left 0.3s ease;
28   z-index: 1000;
29   overflow-y: auto;
30   box-shadow: 2px 0 10px rgba(0,0,0,0.2);
31 }
32
33 .sidebar.open {
34   left: 0;
35 }
```

The **Header** is fixed at the top of the page and displays the page title, a search bar, notifications, and the admin profile. It keeps essential actions and status indicators always visible, providing quick access to frequently used functions. This enhances usability and allows users to navigate the app efficiently.

```
4  const Header = ({ pageTitle }) => {
5    // Search Bar
14    </div>
15    <button className="notif-btn">
16      <i className="fas fa-bell"></i>
17      <span className="badge">3</span>
18    </button>
19    <div className="user-profile">
20      
21    </div>
22    </div>
23    </header>
24  );
25  };
26
27  export default Header;
28 }
```

The **Appointments** page lets the admin **manage doctor appointments** with add, edit, delete, search, filter, and sort features. It also shows **status colors** (green, yellow, red) and allows **exporting appointments to CSV**.
