

Daily Status Report

Name : M. Eswari

Date : 27-10-2025

Today, I worked on enhancing the healthcare project by designing the **Medicine page structure** and improving the **Appointments page** in the admin dashboard.

I focused on creating a clean layout, organized data display, and user-friendly interface for both pages. Overall, the updates improved the **dashboard's functionality, usability, and visual appeal.**

Appointment.jsx :

The modified **Appointments Page** now features a clean blue header with integrated filters, search, and sorting options. A stylish circular **+ Add** button allows quick appointment creation from any view. Each appointment is displayed in a fixed-size card showing patient, doctor, date, and status details. Status colors—green for confirmed, yellow for pending, and red for cancelled—improve visual clarity.

Overall, the design is more user-friendly, organized, and visually appealing for managing daily appointments.

The screenshot displays a web application development environment with a dark theme. The interface is divided into several sections:

- File Explorer (Left):** Shows a project structure for a healthcare system. The 'src' directory is expanded, showing 'components' > 'Appointments'. The 'Appointments.jsx' file is selected.
- Code Editor (Center):** Displays the code for 'Appointments.jsx'. The code uses React with useState and useEffect hooks to manage a list of appointments. It includes a search and filter functionality. The code is as follows:

```
1 import React, { useState, useEffect } from "react";
2 import "../Appointments.css";
3 import Header from "../../Header/Header";
4
5 const doctors = ["Dr. Smith", "Dr. Adams", "Dr. Clark", "Dr. Patel", "Dr. Kumar"];
6
7 const initialAppointments = [
8   { id: 1, patientId: "P001", patient: "John Doe", doctor: "Dr. Smith", date: "2025-10-26", time: "10:00", status: "Confirmed", department: "Cardiology" },
9   { id: 2, patientId: "P002", patient: "Jane Doe", doctor: "Dr. Adams", date: "2025-10-27", time: "11:30", status: "Pending", department: "Neurology" },
10  { id: 3, patientId: "P003", patient: "Robert Brown", doctor: "Dr. Clark", date: "2025-10-27", time: "13:00", status: "Cancelled", department: "Orthopedics" },
11  { id: 4, patientId: "P004", patient: "Ava Green", doctor: "Dr. Patel", date: "2025-10-28", time: "09:00", status: "Confirmed", department: "Pediatrics" }
12 ];
13
14 const Appointments = () => {
15   const [appointments, setAppointments] = useState([]);
16   const [modalOpen, setModalOpen] = useState(false);
17   const [formData, setFormData] = useState({ patientId: "", patient: "", doctor: "", date: "", time: "", status: "Pending", department: "" });
18   const [editingId, setEditingId] = useState(null);
19   const [search, setSearch] = useState("");
20   const [filterStatus, setFilterStatus] = useState("All");
21   const [filterDoctor, setFilterDoctor] = useState("All");
22   const [filterDate, setFilterDate] = useState(new Date().toISOString().slice(0, 10)); // default today
23   const [sortBy, setSortBy] = useState("date");
24
25   useEffect(() => {
26     setAppointments(initialAppointments);
27   }, []);
28
29   const openModal = (apt = null) => {
30     if (apt) {
31       setEditingId(apt.id);
32       setFormData({ ...apt });
33     } else {
34       setEditingId(null);
35       setFormData({ patientId: "", patient: "", doctor: "", date: "", time: "", status: "Pending", department: "", notes: "" });
36     }
37   }
38 }
```
- Terminal (Bottom):** Shows the command 'Ln 111, Col 52 (1 selected) Spaces: 2 UTF-8 CRLF {} JavaScript JSX'.

```
3 /* Container */
4 .appointments-container {
5   max-width: 1400px;
6   margin: 5px auto;
7   padding: 10px 25px 25px;
8   font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
9   background-color: #f7f9fb;
10  border-radius: 10px;
11 }
12
13
14
15 /* --- Top Blue Header --- */
16 .appointments-header-top {
17   background-color: #1e90ff;
18   color: white;
19   padding: 10px 25px;
20   border-radius: 10px 10px 0 0;
21   display: flex;
22   justify-content: space-between;
23   align-items: center;
24   flex-wrap: nowrap; /* Make all items stay in one line */
25   gap: 12px;
26   margin-bottom: 15px;
27   box-shadow: 0 3px 10px rgba(0, 0, 0, 0.15);
28 }
29
30 .appointments-header-top h2 {
31   margin: 0;
32   font-size: 1.5rem;
33   font-weight: 600;
34 }
35
36 .header-search {
37   padding: 10px 14px;
38   border-radius: 6px;
39   border: none;
40   font-size: 1rem;
```

The output displays a modern appointments dashboard with a blue header, filters, and fixed-size appointment cards. Each card shows clear details with color-coded statuses and an easy-to-access circular “+ Add” button for new entries.

MedicinePage.jsx

The **Medicine Page** in the Admin Dashboard helps manage and monitor all medicines efficiently. It displays key stats like total medicines, out-of-stock items, and expiring soon drugs using summary cards. Admins can search, view, edit, or delete medicines directly from a detailed table.

The page ensures organized inventory tracking with interactive filters and a clean, user-friendly design.

When you click on cards like “Expiring Soon” or “Out of Stock,” the table dynamically updates to show only those medicines, making inventory tracking faster and smarter.
