

Daily Status Report

Name : M. Eswari

Date :05-11-2025

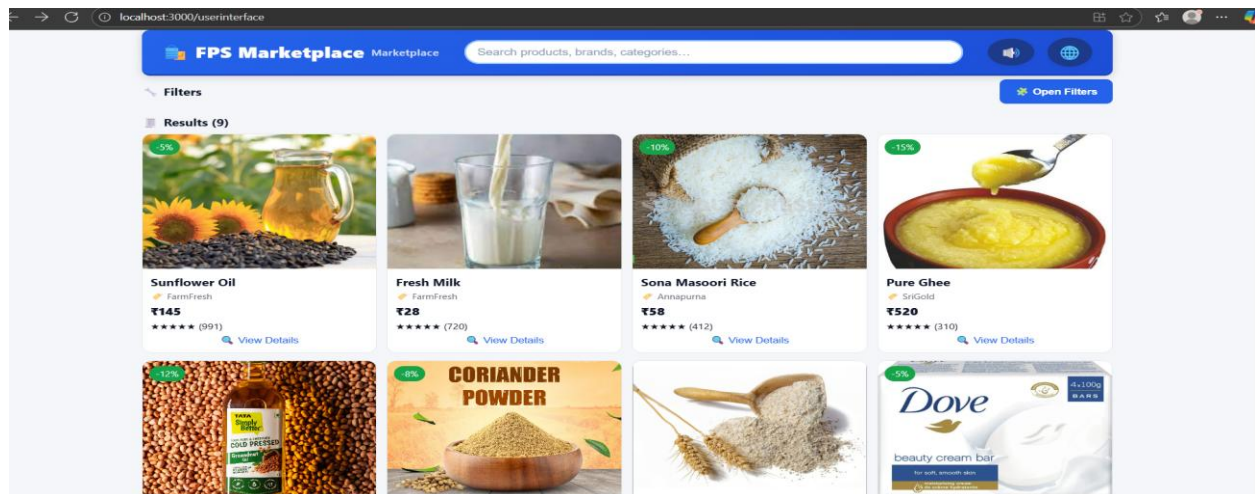

Today worked on building a complete multilingual FPS marketplace with product browsing, filters, sorting, detailed pages, and interactive FPS map discovery.

Also added ratings, reviews, moderation, analytics, and enhanced the UI with a Flipkart-style responsive

Supports **English and Telugu** language switching dynamically across all UI text.

Includes **text-to-speech integration** to read product search results aloud.

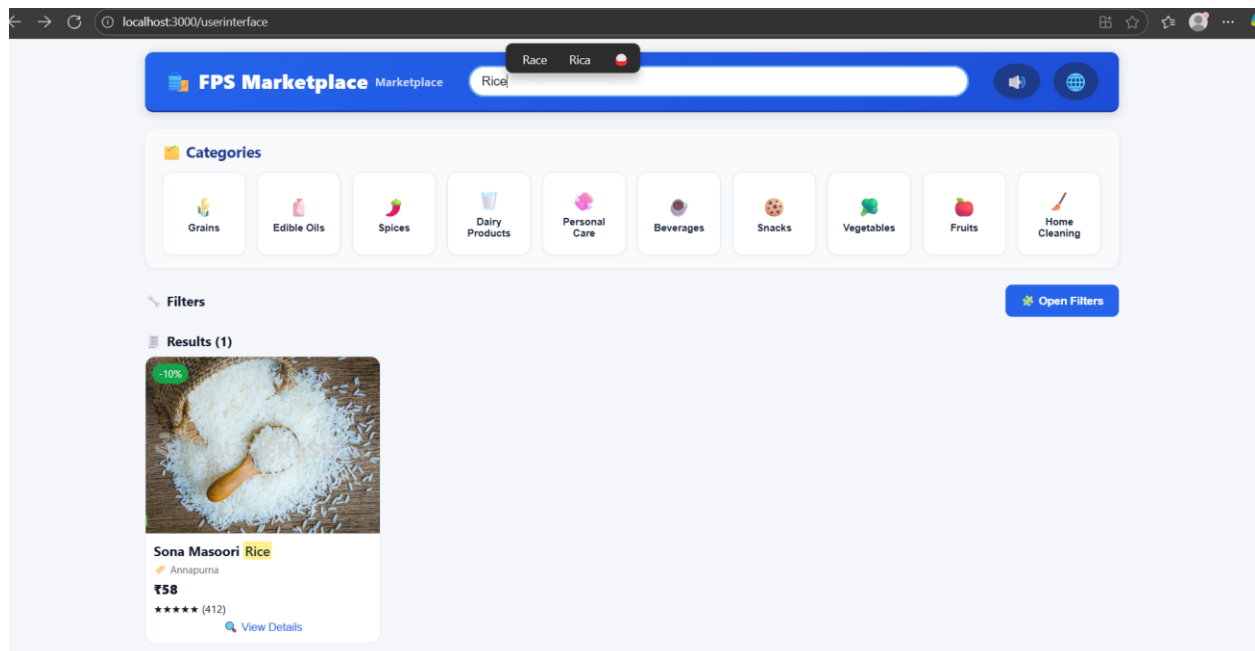

Provides **Telugu transliteration** and **typo-tolerant** search input for smooth bilingual UX.

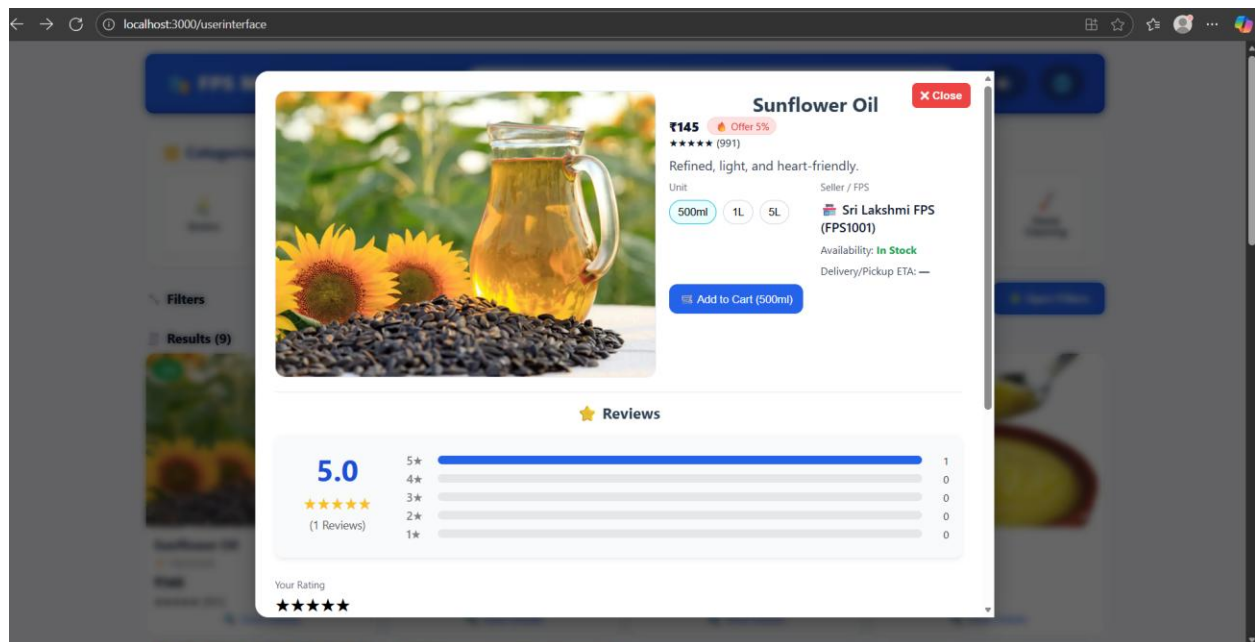

Displays all products under **localized categories and sub-categories** with icons.

Implements **real-time search suggestions** with typo and transliteration handling.

Search results highlight matched text and support **auto-suggest dropdowns**.

Shows a **high-resolution product image with zoom**, multilingual description, and unit options. Displays **seller/FPS name, availability, and estimated delivery/pickup time** dynamically. Includes “Add to Cart” and integrated **ratings & reviews** below product details. Allows customers to submit **star-based ratings**, multilingual text reviews, and photo uploads. Displays **verified purchase badges** and tracks “helpful” votes and reports. Supports **review sorting by Most Helpful or Latest**, providing clear insights.

Integrates **real interactive map (Leaflet)** showing FPS dealers as markers. Requests **user location permission** or accepts **manual address input** as fallback.

Displays dealer profile with **store name**, **distance**, **working hours**, **categories**, and **options**.
