

Daily status Report

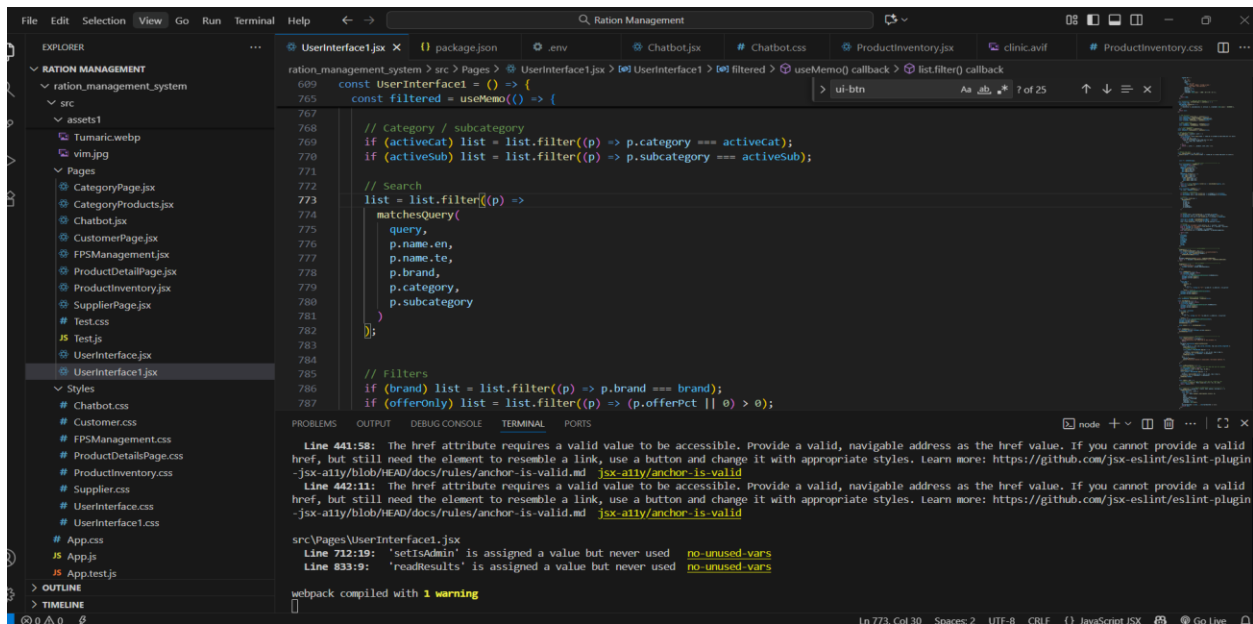

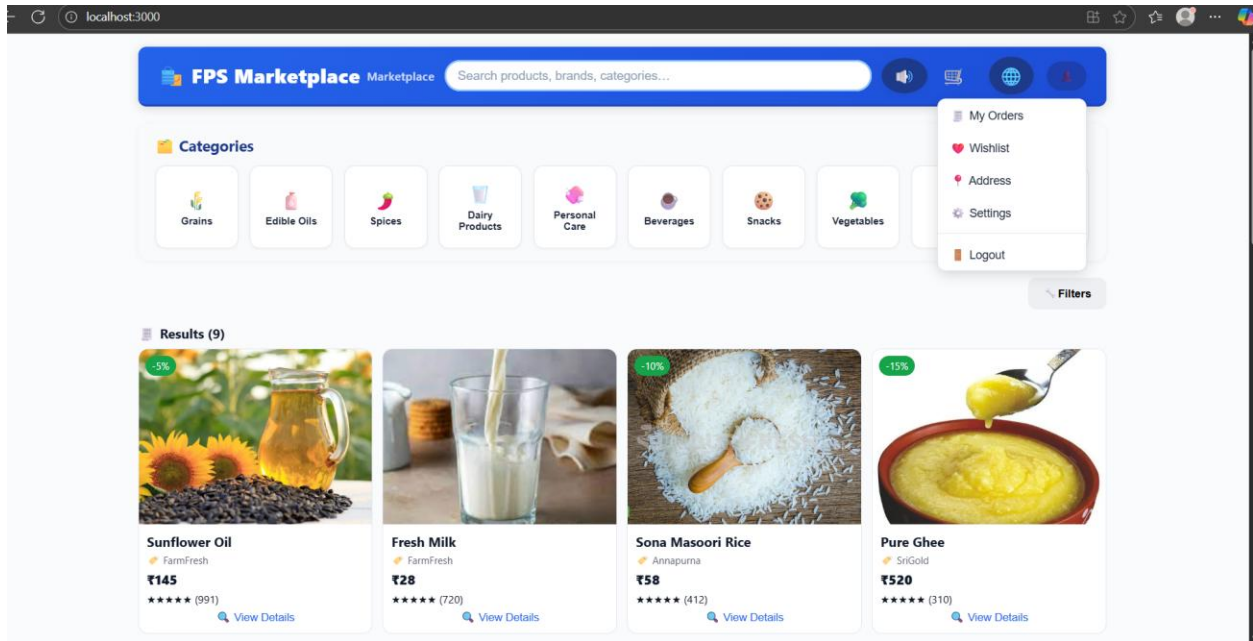

Name :M. Eswari

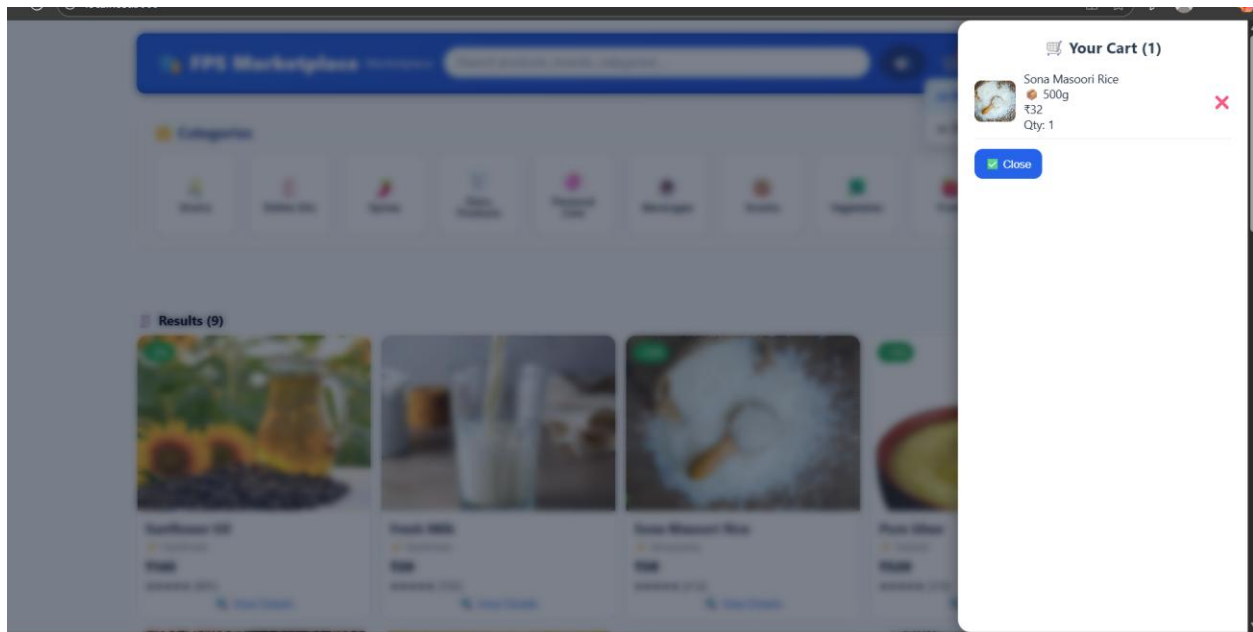

Date : 06-11-2025

Built a multilingual FPS marketplace featuring product details, smart filters, and interactive category browsing. Integrated secure payment gateways with dynamic cart and real-time checkout flow. Added profile management with order history, wishlist, and address options for a complete e-commerce experience.

Accessible via dropdown under the profile icon in the header. Contains quick options like My Orders, Wishlist, Address, and Logout. Displays a detailed order history modal showing past payments and item details.

```
UserInterface1.jsx  {} package.json  .env  Chatbot.jsx  # Chatbot.css  ProductInventory.jsx  clinic.avif  # ProductInvento
ration_management_system > src > Pages > UserInterface1.jsx > [0] UserInterface1
609  const UserInterface1 = () => {
1251    }
1252  </div>
1253
1254  /* Profile Dropdown */
1255  <div className="ui-profile-menu">
1256    <button
1257      className="ui-btn"
