

WORK UPDATE

Name: D Sri Ramya

Date:12-3-2026

today I worked on the **Project Closure Module** in the AP RERA portal. I developed the Closure Details page where the application number, project name, and promoter name are displayed and the promoter can upload all the required supporting documents for closing the project. I implemented the file upload functionality and added validation to ensure that all documents are uploaded before submitting the application. After uploading all the documents, when the user clicks the submit button, the system shows a successful submission popup. The UI and functionality are now working according to the portal design.

Overview

The **Project Closure Module** is developed as part of the **AP RERA (Andhra Pradesh Real Estate Regulatory Authority) portal**. This module is used by promoters to submit required documents for closing a registered real estate project after the completion of construction and other legal formalities.

The screenshot displays the 'Quarterly Updates' section of the AP RERA portal. At the top, there is a navigation bar with the portal's name and a search bar. Below this, a progress bar shows four steps: 1. Documents, 2. Block/Villa Details (currently active), 3. Floor Details, and 4. Flat Details. The main content area includes a dropdown menu for 'Project Consists of:' set to 'Plot'. Below this is a table with columns for S.No, Plot No, Construction Status, Sale Status, Remarks, Sale Document, and Upload Photos. Two rows of data are visible, each with a checkbox, a plot number, and a 'Choose File' button for uploading documents. The 'Upload Photos' column contains an 'Upload/View' link.

S.No	Plot No	Construction Status	Sale Status	Remarks	Sale Document	Upload Photos
☐	1	Select	Select		Choose File No f... sen Upload	Upload/View
☐	2	Select	Select		Choose File No f... sen Upload	Upload/View

The closure process ensures that all the legal, structural, and financial responsibilities related to the project are fulfilled. Through this module, promoters can upload the necessary documents required by the RERA authority and submit them through the portal.

The system also validates whether all required documents are uploaded before allowing submission. Once the documents are uploaded successfully and the user clicks the submit button, the system displays a confirmation message indicating that the application has been submitted successfully.

WORK UPDATE

This module improves transparency and simplifies the process of project closure through an online system.

Objectives of the Module

Objectives

The main objectives of the **Project Closure Module** are:

1. To provide an online platform for promoters to close completed projects.
2. To collect all necessary supporting documents required for project closure.
3. To ensure compliance with RERA rules and regulations.
4. To maintain transparency and accountability in project completion.
5. To reduce manual paperwork and make the process faster.

The screenshot shows a web interface for 'Quarterly Updates'. At the top, a blue header bar contains the breadcrumb 'You are here: Project Registration / Existing Project / Quarterly Updates' and a 'Back to Dashboard' button. Below the header, a progress bar with four steps is shown: 1. Documents (active), 2. Block/Villa Details, 3. Floor Details, and 4. Flat Details. The main form area has a dropdown menu labeled 'Project Consists of:' with 'Residential' selected. Below this is a table with columns: S.No, Block Name, Construction Status, Remarks, and Upload Photos. The table contains three rows, each with a checkbox, a 'Select Block' dropdown, a 'Select' dropdown, and an 'Upload Photos' input field. To the right of each row is an 'Upload/View' button. At the bottom right of the form, there are 'Submit' and 'Reset' buttons.

S.No	Block Name	Construction Status	Remarks	Upload Photos
☐	1	Select Block	Select	
☐	2	Select Block	Select	
☐	3	Select Block	Select	

Benefits

The closure module provides several benefits such as:

- Easy document submission through the portal.
- Secure digital storage of documents.
- Faster project closure approval process.
- Improved transparency for regulatory authorities.
- Reduced manual work and documentation errors.

WORK UPDATE

Functional Requirements

The **Closure Details page** provides the following functionalities.

Project Information Display

The page displays important project information such as:

- Application Number
- Project Name
- Promoter Name

These fields are automatically filled and are displayed in **read-only format**.

Supporting Documents Upload

The promoter is required to upload the following supporting documents:

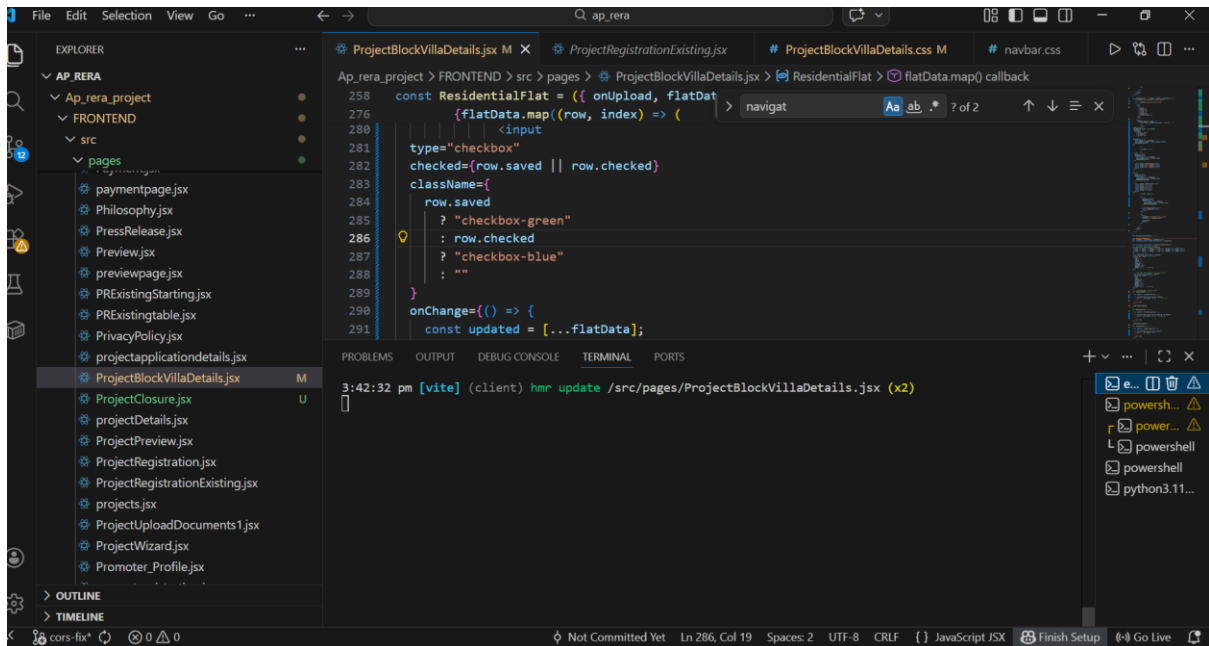

1. Occupancy Certificate
2. Sale Deed Copies
3. Association of Allottees Document
4. Common Areas / Amenities Handover Document
5. Structural Liability Affidavit (F6)
6. Unsold Units Affidavit (F7)
7. Consolidated Bank Statement
8. Latest Photographs of the Project

Each document has a **file upload field** where the user can upload the required file.

File Name Display

Once the user uploads a document, the file name is displayed next to the upload field so the user can confirm the uploaded document.

WORK UPDATE

Submission and Validation

The module includes a validation mechanism before submitting the application.

Validation Process

Before submitting the application, the system checks whether all the required documents are uploaded.

If any document is missing, the system shows a validation message asking the user to upload all required documents.

Example message:

Please upload all required documents

If all documents are uploaded successfully, the user can click the **Submit Application** button.

After clicking the submit button, a popup message appears:

Application Submitted Successfully

This message confirms that the closure application has been successfully submitted.

User Interface

The page design follows the AP RERA portal layout and includes:

- Project information section
- Supporting documents upload section

WORK UPDATE

- Reset button to clear uploaded files
- Submit Application button to submit the closure request

The buttons follow the portal color scheme:

- Reset → Grey
- Submit Application → Blue

This provides a clean and consistent user interface for the portal.
