Databases: MySQL, PL/SQL, Oracle SQL
Deployment & Tools: AWS (Basics), Docker, Ngrok, Git, GitHub
Productivity Tools: Microsoft Office (Excel, Word, PowerPoint)
Project Management: Trello, Jira, Notion
Soft Skills: Time Management, Problem-Solving, Effective Communication

EXPERIENCE

Software Developer(OAP Developer) | Jhaishna Pvt.LTD Apr 2025 - Present

Hathway Project Overview (Own Words):

- Provides internet services like broadband connection, user signup, and plan selection
- Offers digital TV services where users can subscribe to channels and entertainment packages
- Manages cable TV billing, payments, and subscription details for customers
- Handles complete customer process from registration to activation, billing, and support

Key Responsibilities :

- Developed and maintained backend services using Java and Spring Boot for various business modules
- Designed and managed Oracle databases for efficient data handling and optimization
- Implemented AutoPay and Smart UPI payment integration for secure and automated transactions
- Developed Two-Factor Authentication (2FA) to enhance application security and user verification
- Handled database operations for managing customer requests, including ticket creation and issue tracking
- Built responsive user interfaces using HTML, CSS, and JavaScript
- Automated server-side tasks using Shell scripting for improved efficiency
- Collaborated with team members to ensure smooth project delivery and performance improvement

HRMS (Human Resource Management System) | Python Flask Project

Project Overview :

Developed a web-based Human Resource Management System to manage employee information, attendance, leave requests, and basic HR operations in an organization.

Key Responsibilities :

- Developed backend application using Python Flask framework for handling employee data and HR processes
- Designed and implemented RESTful APIs for employee management, attendance tracking, and leave handling

- Created responsive user interfaces using HTML, CSS, and JavaScript
- Implemented user authentication and role-based access control (Admin/Employee)
- Managed database operations using SQL (MySQL/SQLite) for storing employee records and transactions
- Built modules for employee registration, attendance, leave requests, and approvals
- Ensured data validation and secure handling of user information

Healthcare Management System | React & Spring Boot

Project Overview :

Developed a full-stack Healthcare Management System to manage hospitals, doctors, patients, and medical services. The system helps streamline operations like appointment booking, patient records, and medical management.

Key Responsibilities :

- Developed frontend using React.js to create dynamic and responsive user interfaces
- Built backend services using Java Spring Boot for handling business logic and APIs
- Designed and implemented RESTful APIs for managing doctors, patients, appointments, and hospital data
- Integrated frontend with backend for seamless data flow and real-time updates
- Managed database operations for storing and retrieving healthcare-related data
- Implemented authentication and role-based access control for Admin, Doctor, and Staff modules
- Developed modules for appointment booking, patient management, and medical records tracking
- Ensured application performance, scalability, and user-friendly experience

PROJECTS

Smart Expense Tracker (Spring Boot + React)

Developed a web application to track daily expenses and manage personal finances. Built backend using Spring Boot and frontend using React for a smooth user experience. Implemented features like adding expenses, categorizing, and viewing monthly reports.

Online Banking System (Spring Boot)

Developed a basic banking application to manage user accounts and transactions. Implemented features like account creation, balance check, and fund transfer using Spring Boot. Focused on secure login and proper transaction handling.

E-commerce Website

- Developed a full-stack e-commerce platform with React.js for the front-end and Spring Boot for the back-end, Improving user engagement by 15%.
- Integrated MySQL for efficient relational database management, ensuring seamless product and customer data.
- Optimized the platform's performance through efficient API design and load balancing, reducing server response times by 20%

Certifications

- Full stack Development certification in Smart Internz.
- Web Development Course Completion Certification .
- Java Full Stack Certification in Naresh IT.
