React.js

JavaScript

vamsi B

Full Stack Java Developer | 1 Year Experience at Jhashna Technologies | Spring Boot | React.js | SQL | python basics | Building Scalable Web Applications

Secunderābād, Telangana, India

Summary

I am a Full Stack Java Developer with 1 year of experience at Jhashna Technologies, specializing in building scalable and efficient web applications.

I have hands-on experience in developing end-to-end applications using Spring Boot, React.js, and SQL, with a strong focus on backend development, API design, and database management.

At Jhashna Technologies, I have worked on multiple real-time projects, including:

Hathway Auto Payment System – Developed and integrated auto payment workflows, including mandate registration and transaction handling

Smart UPI Integration – Implemented secure UPI-based payment solutions with response handling and backend processing

Healthcare Management System – Built modules for managing patients, doctors, appointments, and medical records

APRERA Project – Contributed to complaint management, project registration, and hearing modules

I am passionate about writing clean, efficient, and maintainable code, and continuously improving my skills in modern web technologies.

I am currently looking for opportunities to grow as a Full Stack Java Developer and contribute to innovative and impactful projects.

Experience

Jhaishna Limited

Web Developer

April 2025 - Present (1 year 1 month)

Vijayawada, Andhra Pradesh, India

Full Stack Java Developer with 1 year of experience at Jhashna Technologies, working on end-to-end web application development.

Developed and maintained web applications using Spring Boot, React.js, and SQL

Designed and implemented RESTful APIs for seamless frontend-backend integration

Built dynamic and responsive user interfaces using React.js

Worked with SQL databases for data modeling, query optimization, and data handling

Key Projects & Contributions:-

Hathway Auto Payment System: Developed and integrated auto payment functionality, handling mandate registration and payment processing workflows

Smart UPI Integration: Implemented UPI-based payment solutions with secure transaction handling and response processing

Healthcare Management System: Built modules for managing patients, doctors, appointments, and medical records

APRERA Project: Contributed to backend and frontend development for complaint handling, project registration, and hearing management modules

Debugged and resolved application issues to improve performance and user experience

Collaborated with cross-functional teams to deliver scalable and efficient solutions

Followed best coding practices and participated in code reviews

Education
