

Daily Status Report

NAME : M. Eswari

Date : 30-03-2026

Today, I worked on enhancing the Admin Complaints page by transforming it from a simple list view into a structured and professional table layout. I implemented search functionality, status filtering, and added stat cards to display counts for Total, Open, Pending, Closed, and Rejected complaints. I updated the UI to align with the API response by correctly mapping statuses and introducing new columns like Register Number and Reject Reason. Additionally, I improved user interaction by making stat cards clickable for filtering, added form-type filters, and refined the toolbar layout. Finally, I completed the update by renaming “Accepted” to “Closed” and ensuring all filters and status displays function accurately.
