

TODAY WORK UPDATE

MANI RAKESH VASAMSETTI

02-03-2026

Today, I worked on testing the Ontract Services web application. I thoroughly tested the Signup page by validating all input fields such as Company Name, Business Registration Number, Registered Email ID, Mobile Number, Password, Confirm Password, and reCAPTCHA functionality. I verified field validations, mandatory checks, password visibility toggle, and proper error messages.

I also tested the Login page by validating the Registered Email ID, Password field, password show/hide option, and Captcha verification. I checked both valid and invalid login scenarios to ensure proper authentication and error handling.

Additionally, I tested the Home page UI, including the search functionality (location and service search), and verified the responsiveness of the "Find Trusted Services Near You" section. I reviewed the "Our Top Services" section, ensuring all service cards (Home Cleaning, Salon at Home, AC Repair, Electrician, Plumbing, Pest Control) display correctly with images and descriptions.

Finally, I validated the footer section links (Products, Company, Resources, Subscribe option) and checked navigation links like Home, Login, and Sign Up for proper redirection.

Overall, today's work focused on functional testing, UI validation, field validations, navigation checks, and basic user flow testing for Signup, Login, and Home pages.
